Credit Ratings and Rationale

By its letters dated September 01, 2017 and revalidation letters dated March 01, 2019 and March 25, 2019, BRICKWORK has assigned a rating of “BWR AA+” (BWR Double A plus) to the issue of NCDs i.e. for Secured NCDs.

All Instruments with BWR AA+ rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk. Set out below is an extract of the rating rationale adopted by BRICKWORK dated December 17, 2018

“Brickwork Ratings (BWR) assigned BWR AA+ (Pronounced BWR Double A Plus) with a stable outlook for NCD issues aggregating to ₹2,000 cr. The rating “BWR AA+” stands for an instrument that is considered to have high degree of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk. The rating, inter alia, factors the Infrastructure Finance Company status enjoyed by SIFL as per RBI’s prescribed norms, the time tested experience of the Promoter group in line of infrastructure financing and equipment financing businesses, improvement of Net Interest Income and profit margin, improvement in assets quality as evidenced in decreasing NPA levels, adequate capitalization and sufficient cushion against commercial paper issue available in the form of unutilized working capital limits. The rating, is however, constrained by continued slow pace of infrastructure sector and high portfolio concentration in power sector, road and SEZ/Industrial Park Sector.

For removal of doubt, “*Institutional Portion*”, “*Non-Institutional Portion*” and “*Individual Category Portion*” are individually referred to as “*Portion*” and collectively referred to as “*Portions*”.

For the purposes of determining the number of Secured NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of Secured NCDs to be allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription under the Tranche 1 Issue upto ₹5,000 million for Secured NCDs. The aggregate value of Secured NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription under the Tranche 1 Issue), and/or the aggregate value of Secured NCDs upto the Base Issue Size shall be collectively termed as the “**Overall Issue Size**”.

Allocation Ratio for Secured NCDs

<i>Institutional Portion</i>	<i>Non-Institutional Portion</i>	<i>Individual Category Portion</i>
15% of Overall Issue Size	15% of Overall Issue Size	70% of Overall Issue Size

Retention of Oversubscription

Our Company is making a public Issue of Secured NCDs aggregating upto ₹1,000 million (Base Issue Size) with an option to retain oversubscription upto ₹4,000 million, aggregating upto ₹5,000 million (Tranche 1 Issue Size) within the Shelf Limit i.e. up to ₹15,000 million.

Basis of Allotment for Secured NCDs

- (a) Allotments in the first instance:
 - (i) Applicants belonging to the Institutional Portion (Category I), in the first instance, will be allocated Secured NCDs upto 15% of Tranche 1 Issue Size on first come first served basis which would be determined on the basis of upload of their Applications in to the electronic book with Stock Exchanges;
 - (ii) Applicants belonging to the Non-Institutional Portion (Category II), in the first instance, will be allocated Secured NCDs upto 15% of Tranche 1 Issue Size on first come first served basis which

would be determined on the basis of upload of their Applications in to the electronic book with Stock Exchanges;

- (iii) Applicants belonging to the Individual Portion (Category III), in the first instance, will be allocated Secured NCDs upto 70% of Tranche 1 Issue Size on first come first served basis which would be determined on the basis of upload of their Applications in to the electronic book with Stock Exchanges;
- (b) Allotments, in consultation with the Designated Stock Exchange, shall be made on date priority basis i.e. a first-come first-serve basis, based on the date of upload of each Application in to the Electronic Book with Stock Exchange, in each Portion subject to the Allocation Ratio. However, on the date of oversubscription, the allotments would be made to the applicants on proportionate basis.

Specific attention is drawn to the circular (No. CIR/IMD/DF/18/2013) dated October 29, 2013 issued by SEBI, which amends the provisions of circular (No. CIR/IMD/DF-1/20/2012) dated July 27, 2012 to the extent that it provides for allotment in public issues of debt securities to be made on the basis of date of upload of each application into the electronic book of the Stock Exchanges, as opposed to the date and time of upload of each such application. In the event of, and on the date of oversubscription, however, allotments in public issues of debt securities is to be made on a proportionate basis.

- (c) Under Subscription:
Under subscription, if any, in any Portion, priority in allotments will be given in the following order (decreasing order of priority):
 - i. Individual Category Portion
 - ii. Non-Institutional Portion
 - iii. Institutional Portion

Within each Portion, priority in Allotments will be given on a first-come-first-serve basis, based on the date of upload of each Application into the electronic system of the Stock Exchanges.

- (d) For each Portion, all Applications uploaded on the same day in to the Electronic Book with Stock Exchanges would be treated at par with each other. Allotment would be on proportionate basis, where Secured NCDs uploaded into the Platform of the Stock Exchanges on a particular date exceeds Secured NCDs to be allotted for each Portion respectively.
- (e) Minimum allotments of 1 (one) Secured NCD and in multiples of 1 (one) Secured NCD thereafter would be made in case of each valid Application.
- (f) Allotments in case of oversubscription:

In case of an oversubscription, allotments to the maximum extent, as possible, will be made on a first-come first-serve basis and thereafter on proportionate basis, i.e. full allotment of Secured NCDs to the Applicants on a first come first basis up to the date falling 1 (one) day prior to the date of oversubscription (i.e. where in the number of Secured NCDs available for allotment in the respective Category is less than the demand for Secured NCDs by the applicants in the respective Category) and proportionate allotment of Secured NCDs to the Applicants on the date of oversubscription (based on the date of upload of each Application into the Electronic Book with Stock Exchanges, in each Category).

However, for the purposes of allotment of Secured NCDs under the Tranche 1 Issue, Applications shall be grouped based on the PAN, i.e. Applications under the same PAN shall be grouped together and treated as one Application and re-categorised based on their total application amount. This re- categorization of investor categories may result in proportionate allotment on the date of oversubscription in the respective categories. Pursuant to re-categorization, each of the applications (based on the date of upload of each Application into the Electronic Book with Stock Exchanges, in each Category) made by the applicant, will compete for allocation with other applications made by the applicants in that respective Category on that respective date.

- (g) Proportionate Allotments: For each Portion, on the date of oversubscription:
 - i) Allotments to the Applicants shall be made in proportion to their respective Application size, rounded off to the nearest integer,
 - ii) If the process of rounding off to the nearest integer results in the actual allocation of Secured NCDs being higher than the Tranche 1 Issue size, not all Applicants will be allotted the number of Secured NCDs arrived at after such rounding off. Rather, each Applicant whose allotment size, prior to rounding off, had the highest decimal point would be given preference,
 - iii) In the event, there are more than one Applicant whose entitlement remain equal after the manner of

distribution referred to above, our Company will ensure that the basis of allotment is finalized by draw of lots in a fair and equitable manner.

(h) Applicant applying for more than one Series of Secured NCDs:

If an Applicant has applied for more than one Series of Secured NCDs, and in case such Applicant is entitled to allocation of only a part of the aggregate number of Secured NCDs applied for, the Series-wise allocation of Secured NCDs to such Applicants shall be in proportion to the number of NCDs with respect to each Series, applied for by such Applicant, subject to rounding off to the nearest integer, as appropriate in consultation with Lead Managers and Designated Stock Exchange.

All decisions pertaining to the basis of allotment of Secured NCDs pursuant to the Tranche 1 Issue shall be taken by our Company in consultation with the Lead Managers and the Designated Stock Exchange and in compliance with the aforementioned provisions of this Tranche 1 Prospectus. Any other queries / issues in connection with the Applications will be appropriately dealt with and decided upon by our Company in consultation with the Lead Managers.

- a. Secured NCDs:
 - (i) first with monthly interest payment in increasing order of tenor; and

When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
 - d.
 - (i) When the resident Debenture Holder with PAN (not being a company or a firm) submits a declaration as per the provisions of section 197(1A) of the I.T. Act in the prescribed Form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the previous year in which such income is to be included in computing his total income will be NIL. However, under section 197A (1B) of the I.T. Act, Form 15G cannot be submitted nor considered for exemption from deduction from tax at source if the aggregate of income of the nature referred to in the said section such as dividend income referred to in Section 194 of the I.T Act, interest on securities, interest on sum given on interest, income from mutual fund units, withdrawal from National Savings Scheme, etc. credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax.

To illustrate, as on 01.04.2018, the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is ₹ 2,50,000; in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial year (Senior Citizen) is ₹ 3,00,000; and in the case of every individual being a resident in India, who is of the age of 80 years or more at any time during the Financial year (Super Senior Citizen) is ₹ 5,00,000 for Assessment Year 2019-20. Further, Section 87A of the I.T. Act provides a tax rebate of 100 percent of income-tax or an amount of ₹ 2,500 whichever is less to a resident individual

whose total income, (less deductions under section 80 of the I.T Act) does not exceed ₹ 3,50,000 during the Financial year.

- (ii) Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non-deduction of tax at source in accordance with the provisions of section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.
 - (iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No.15G with PAN / Form No.15H with PAN / Certificate issued u/s 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.

Act, capital gains arising on the transfer of long term capital assets being listed securities are subject to tax at the rate of 20% of capital gains calculated after reducing indexed cost of acquisition or 10% of capital gains without indexation of the cost of acquisition. The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.

However as per the third proviso to section 48 of I.T. Act, benefit of indexation of cost of acquisition under second proviso of section 48 of I.T. Act, is not available in case of bonds and debenture, except capital indexed bonds issued by the Government and sovereign gold bond issued by the RBI. Thus, long term capital gains arising out of listed debentures would be subject to tax at the rate of 10 % computed without indexation.

In case of an individual or HUF, being a resident, where the total income as reduced by such long term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.

In addition to the aforesaid tax, a surcharge of 10% of such tax liability (if net income exceeds Rs. 5,000,000 and does not exceed ₹ 10,000,000) and 15% of such tax liability (if net income exceeds Rs. 10,000,000) in case of individuals, a surcharge of 12% of such tax liability in the case of firms (if net income exceeds Rs. 10,000,000) and a surcharge of 7% (if net income is in the range of Rs.10,000,000 to Rs. 100,000,000) & 12% (if net income exceeds Rs. 100,000,000) of such tax liability in case of domestic companies is also payable. A 4% Health and Education cess on the total income tax (including surcharge) is payable by all categories of taxpayers.

4. Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such short term capital gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act.
6. Interest on application money would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 194A of the Income Tax Act, 1961.
7. Securities Transaction Tax (“STT”) is a tax being levied on all transactions in specified securities done on the stock exchanges at rates prescribed by the Central Government from time to time. STT is not applicable on transactions in the Bonds.
8. As per Section 74 read with section 71 of the I.T. Act, short-term capital loss on debentures suffered during the year is allowed to be set-off against short-term as well as long-term capital gains of the said year. Balance loss, if any, could be carried forward for eight years for claiming set-off against subsequent years’ short-term as well as long term capital gains. Act in accordance with and subject to the provisions contained therein.
 - d. As per section 115H of the I.T. Act, where a non-resident Indian becomes a resident in India in any subsequent year, he may furnish to the Assessing Officer a declaration in writing along with return of income under section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian Company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein. On doing so, the provisions of Chapter XII-A shall continue to apply to him in relation to such income for that assessment year and for every subsequent assessment year until the transfer or conversion (otherwise than by transfer) into money of such assets.
2. In accordance with and subject to the provisions of section 115I of the I.T. Act, a Non-Resident Indian may opt not to be governed by the provisions of Chapter XII-A of the I.T. Act. In that case,

If part of such net sales consideration is invested within the prescribed period in a residential house, then such gains would be chargeable to tax on a proportionate basis.

This exemption is available, subject to the condition that the Debenture Holder does not own more than one residential house at the time of such transfer. If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is transferred. Similarly, if the Debenture Holder purchases within a period of two years or constructs within a period of three years after the date of transfer of capital asset, another residential house (other than the new residential house referred above), then the original exemption will be taxed as capital gains in the year in which the additional residential house is acquired.

We cannot assure you that any of these matters will be settled in our favour or in favour of our Company, Promoter, Directors and Subsidiaries, respectively, or that no additional liability will arise out of these proceedings. An adverse outcome in any of these proceedings could have an adverse effect on our business, financial position, prospects, results of operations and our reputation. For details, please see “*Outstanding Litigation and Statutory Defaults*” on page no. 174 of this Shelf Prospectus.

2. *As an NBFC, the risk of default and non-payment by borrowers and other counterparties may materially and adversely affect our profitability and asset quality. Any such defaults and non-payments would result in write-offs and/or provisions in our financial statements which may materially and adversely affect our profitability and asset quality.*

Our lending activities are exposed to credit risk arising from the risk of default and non-payment by borrowers and other counterparties. Our total outstanding loan (gross of provisions) was ₹ 132,239.30 million as at March 31, 2018 and ₹ 119,759.70 million as at March 31, 2017. Sustained growth may expose us to an increasing risk of defaults as our Portfolio expands. Our gross NPAs as a percentage of total assets (Gross) was 3.17% as of March 31, 2018, - 3.34% as of March 31, 2017 and 4.46% as of March 31, 2016, while the net NPAs as a percentage of total assets (Gross) was 2.40% as of March 31, 2018, 2.20% as of March 31, 2017 and 3.54 %, as of March 31, 2016. Further our total outstanding loan (gross of provisions) was ₹ 117,714.70 million as on December 31, 2018 and our Gross Stage 3 Assets and Net Stage 3 Assets as a percentage of total assets (Gross) has been 10.30% and 5.69% as on December 31, 2018 as per Unaudited Financial Results prepared under IndAS on standalone basis.

The borrowers and/or their guarantors and/or third parties may default in their repayment obligations due to various reasons including insolvency, lack of liquidity, and operational failure.

We cannot be certain, and cannot assure you, that we will be able to improve our collections and recoveries in relation to the NPAs or otherwise adequately control our level of NPAs in the future. Moreover, as our loan Portfolio matures, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control or reduce our level of NPAs, the overall quality of our loan Portfolio may deteriorate and our results of operations may be adversely affected. Furthermore, our current provisions may not be comparable to those of other financial institutions.

We have made provisions of ₹ 1,360 million, ₹ 1,908.00 million and ₹ 1,653.60 million and in respect of gross NPAs as on March 31, 2018, March 31, 2017 and March 31, 2016 respectively. In addition, we maintain a provision against standard assets, as per RBI Guidelines. As of March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015, and March 31, 2014, we have made provisions of ₹ 501.90 million, ₹ 392.40 million, ₹ 354.80 million ₹ 269.20 million, and ₹ 265.60 million respectively in respect of standard assets. There can be no assurance that there will be a decrease in our NPA provisions as a percentage of assets, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs. If there is any deterioration in our portfolio, it could have a material and adverse impact on our business, future financial performance and results of operations.

3. *We are subject to periodic inspections by the RBI. Non-compliance with the RBI’s observations made during any such inspections may have an adverse effect on our results of operations.*

Our Company being an NBFC registered with RBI, we are subject to periodic inspections by RBI under section 45N of the Reserve Bank of India, 1934, pursuant to which RBI inspects our books of accounts and other records. Annual Inspection with reference to financial positions as on 31st March 2017 was conducted by the RBI under Section 45 N of the RBI Act 1934. Based on the annual inspection with reference to financial positions as on March 31, 2017, RBI has made supervisory observations. Our Company has committed to comply with all applicable RBI Regulations and supervisory observations in a time bound manner. We have noted RBI observations carefully and submitted our compliance/response/clarification to the best of our understanding and knowledge. In the event that we are unable to address the supervisory observations of the RBI, it may have a material and adverse impact on our business and operations.

4. We may be exposed to potential losses due to a decline in value of assets secured in our favour, and due to delays in the enforcement of such security upon default by our borrowers which may have a material and adverse effect on our business, future financial performance and results of operations.

Our total loan Portfolio is secured by a mix of movable and immovable assets and/or other collaterals. The value of certain types of assets may decline due to inherent operational risks, the nature of the asset secured in our favour and adverse market and economic conditions (both global and domestic). Our total secured loans assets as on March 31, 2018, March 31, 2017 and March 31, 2016 are ₹ 129,509.10 million, ₹113,828.30 million and ₹129,629.40 million respectively, which is 97.94%, 95.05% and 99.61% of our total loan for respective financial years and our unsecured loans as on March 31, 2018, March 31, 2017 and March 31, 2016 are ₹ 2,730.20 million, ₹5,931.40 million and ₹503.00 million respectively. As on December 31, 2018 our secured loans and unsecured loans are ₹116,488.60 million and ₹1,226.10 million respectively as per Unaudited Financial Results prepared under IndAS on standalone basis.

The value of the security or collateral, as the case may be, may also decline due to delays in insolvency, winding-up and foreclosure proceedings, defects in title, difficulty in locating movable assets, documentation relevant to the assets and the necessity of obtaining regulatory approvals for the enforcement of our collateral over those assets, and as such, we may not be able to recover the estimated value of the assets which would materially and adversely affect our business, future financial performance and results of operations. In general, most project loans are provided on a limited recourse basis. With respect to disbursements made on a non-recourse basis, only the related project assets are available to repay the loan in the event the borrowers are unable to meet their obligations under the loan agreements due to lower than expected cash flows. With respect to disbursements made on a limited recourse basis, project sponsors generally give undertakings for funding shortfalls and cost overruns.

In the event of default by our borrowers, we cannot guarantee that we will be able to realize the full value of our collateral, due to, among other things, delays on our part in taking action and in bankruptcy foreclosure proceedings, stock market downturns, defects in the perfection of collateral, litigation and fraudulent transfers by borrowers. In the event a specialized regulatory agency gains jurisdiction over the borrower, creditor actions can be further delayed.

5. We derive majority/substantial of our revenues from our top 20 borrowers. Our inability to maintain relationship with such borrower or any default and non-payment in future or credit losses of our single borrower or group exposure where we have a substantial exposure could materially and adversely affect our business, future financial performance and results of operations

Being in the infrastructure financing sector, our largest borrowers belong to the infrastructure sectors. Our concentration of exposure is high with our top 20 borrowers having an exposure of 46.34% of our Total Advances as of March 31, 2018 as per disclosure requirement in terms of NBFC-ND-SI prudential norms and NBFC corporate governance directions, 2015 by RBI. Our business and results of operations would majorly depend upon the timely repayment of the interest and principal from these large borrowers. We cannot assure you that we will not experience any delay in servicing of the loan or that we will be able to recover the interest and the principal amount of the loan. Any such delay or default will adversely affect our income from operation and thereby our profitability. In case we are unable to recover the complete the loan disbursed or any part of thereof, and the collateral is also not sufficient to recover our loan, our financial conditions may be adversely affected.

6. We have not received NOC for The Issue from one of our lenders 'Bank of India'

We are required to obtain NoCs from some of our existing lenders in terms of the financial covenants mentioned in the loan agreements with them in order to raise debt by way of public issue. We have applied for NoCs only from those existing lenders who have stipulated the said requirement either in their sanction letter or loan agreement. We have received NoCs from all such existing lenders except one existing lender, the Bank of India ("BOI"). We have applied to BOI for the said NoC. However, as on date of this Shelf Prospectus we have not received the said NoC from BOI. In the event BOI rejects our application, it may affect our liquidity/ resources position to the extent of current outstanding of BOI.

7. Our Company has significant Exposure to certain sectors and to certain borrowers and if these Exposures become non-performing, such Exposure could increase the level of non-performing assets in our Portfolio and materially affect our business, future financial performance and results of operations and the quality of our asset Portfolio.

As at March 31, 2018, we have exposure in the energy, transport and social and commercial infrastructure sectors to the extent of 93.25%. For the foreseeable future, we may have a significant concentration of loans in these three sectors. Any material negative trends or financial difficulties in these sectors could increase the level of non-performing assets in our Portfolio and may adversely affect our business, future financial performance and results of operations. The customers of our Company may default on their obligations to us as a result of their bankruptcy, lack of liquidity, operational failure, breach of contract, government or other regulatory intervention and other reasons such as their inability to adapt to changes in the macro business environment. Historically, borrowers

or borrower groups have been adversely affected by economic conditions in varying degrees. Such adverse impact may limit our ability to recover the dues from the borrowers and predictability of cash flows. Credit losses due to financial difficulties of these borrowers or borrower groups in the future could materially and adversely affect our business, future financial performance and results of operations.

8. This Shelf Prospectus includes certain unaudited financial information, which has been subject to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.

This Shelf Prospectus includes certain information from Unaudited Financial Results in relation to our Company, for the nine months ended December 31, 2018, in respect of which the Statutory Auditors of our Company have issued their Limited Review Report dated February 04, 2019. As this Unaudited Financial Results has been subject only to limited review and not to an audit, any reliance by prospective investors on such unaudited financial information for the nine months ended December 31, 2018 should, accordingly, be limited. Moreover, our financial results for any given fiscal quarter or period, including the nine months ended December 31, 2018, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors in the Issue are advised to read such unaudited financial information for the nine months ended December 31, 2018 in conjunction with the audited financial information provided elsewhere in this Shelf Prospectus in “Financial Information”.

If at any time we are compelled to pay all or a material proportion of these contingent liabilities, it would have a material and adverse effect on our business, future financial performance and results of operations.

10. *If we are unable to manage our growth effectively, our business, future financial performance and results of operations could be materially and adversely affected our business, future financial performance and results of operations could be materially and adversely affected.*

The business of our Company has grown steadily since we began our operations. We intend to continue to grow our businesses, which could place significant demands on our operational, credit, financial and other internal risk controls. It may also exert pressure on the adequacy of our capitalization, making management of asset quality increasingly important.

Although our growth initiatives have contributed to our financial results in recent years, there can be no assurance that we will be able to continue to successfully implement this strategy, or that our growth strategy will continue to be successful. Our future business plan is dependent on our ability to borrow at competitive rate to fund our growth. We may have difficulty obtaining funding on attractive terms. Adverse developments in the Indian credit markets may increase our debt service costs and the overall cost of our funds. Furthermore, our ability to manage key issues such as selecting and retaining skilled personnel, gaining market share, upgrading technological platforms and innovative products. Our inability to effectively manage any such issues may adversely affect our business growth and as a result, impact our businesses, prospects, financial condition and results of operations. We also intend to continue to increase and diversify our customer base and delivery channels. In recent years, we have increased the scope of our branch network. We cannot assure you that we will be successful in achieving our target benchmark level of efficiency and productivity in our branches and our success will depend on various internal and external factors, some of which are not under our control.

An inability to manage our growth effectively and failure to secure the required funding therefore on favourable terms, or at all, could have a material and adverse effect on our business, future financial performance and results of operations.

11. *Our indebtedness and restrictive covenants imposed by our financing agreements could restrict our ability to conduct our business and operations.*

Our financing agreements require us to maintain certain security margins. Should we breach any financial or other covenants contained in any of our financing agreements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs.

Under the terms of some of the loan agreements, our Company is required to obtain the prior written consent of the concerned lender prior to our Company entering into any scheme of expansion, merger, amalgamation, compromise or reconstruction or selling, leasing, transferring all or a substantial portion of its fixed and other assets; making any change in ownership or control or constitution of our Company, or in the shareholding or management or majority of directors, or in the nature of business of our Company; or making amendments in the Company's Memorandum and Articles of Association. In the event that such lenders, in the future decline to consent or delay in granting the consent to our plans of public issue of secured redeemable non-convertible debentures, expansion/ modernization/ diversification of our business, such declination or delay as the case may be may have adverse bearing on our future growth plan.

Our ability to execute expansion plans, including our ability to obtain additional financing on terms and conditions acceptable to us, could be severely and negatively impacted as a result of these restrictions and limitations. Our failure to comply with any of these covenants could result in an event of default, which could accelerate our need to repay the related borrowings and trigger cross - defaults under other borrowings which could materially and adversely affect our liquidity, financial condition and business operations. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives.

12. *We face increasing competition in our business which may result in declining margins if we are unable to compete effectively and as a result our business, future financial performance and results of operations could be materially and adversely affected.*

Our primary competitors are other NBFCs, public sector banks, private sector banks and other financial institution. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low cost deposits, a factor which may render them less competitive.

All such factors have resulted in us facing increased competition from other lenders such as including commercial banks and other NBFCs in each of our lines of businesses. Our ability to compete with them effectively will depend, to some extent, on our ability to raise funds at competitive rates or at all. Furthermore, the spread between the lowest and highest rate of interest offered by various lenders continues to reduce. This competition may intensify further as result of regulatory changes and market liberalization. These competitive pressures affect the industry in which we operate as a whole, and our future success will depend to a large extent on our ability to respond in an effective and timely manner to these competitive pressures. There can be no assurance we will be able to react effectively to these or other market developments or compete effectively with new and existing peers in the increasingly competitive

finance industry. Competition in our industry also depends on, among other things, the evolution of government policies relating to the industry, the entry of new participants into the industry and the extent to which there is consolidation among banks and financial institutions in India. Increasing competition may have an adverse effect on our net interest margin and other income, and, if we are unable to compete successfully, our market share may decline.

13. *Infrastructure projects carry certain risks which, to the extent they materialize, could adversely affect our business and result in defaults/ delays in repayment of our loans and investments declining in value which could have a material and adverse effect on our business, future financial performance and results of operations.*

Our Company's product offerings include debt, equity and mezzanine financings, and financial advisory services related to infrastructure projects in India. As at December 31, 2018 our outstanding loans(gross) were ₹ 117,714.70 million. Infrastructure projects are characterized by project - specific risks like insufficient credit flow, not received funds in time, any legal differences among the various project partners, as well as certain general risks like pending regulatory approvals, change in Government policy, any natural geographical events etc.

If the risks relating to the projects we finance materialize, the quality of our asset Portfolio and our profitability may decline, which would have a material and adverse effect on our business, future financial performance and results of operations.

14. *Failure or inaccurate appraisal of credit or financial worth of clients by our employees may adversely impact our business.*

Our employees need to comply with our internal procedures for an extensive appraisal of credit or financial worth of our prospective clients. Further our employees also rely on the information provided to us by the borrower. We may in certain instances receive information regarding any change in financial condition of our borrower or in certain cases our borrowers may provide inaccurate or incomplete information to us for whatever reason on their part. The lack of availability of information in connection with our borrowers may make it difficult for us to take an informed decision with regard to providing financial facilities to such persons and the attendant risk exposure in connection therewith. Failure or inaccurate appraisal of credit or financial worth of our clients or inability or failure of our employees to comply with our internal procedures for credit appraisal may allow a loan sanctioned to eventually result in a bad debt on our books of accounts. In the event we are unable to check the risks arising out of such lapses, it may have an adverse effect on our business and results of operations.

15. *Our business requires substantial funding, and any disruption in funding sources would have a material and adverse effect on our liquidity and financial condition.*

The liquidity and on-going profitability of our business are, in large part, dependent upon our timely access to funds, and the costs associated with raising such funds. Our funding requirements historically have been met from a combination of shareholder funds, secured and unsecured loan funds in the form of Rupee and foreign currency borrowings from banks and financial institutions, redeemable non-convertible debentures. Thus, our business depends and will continue to depend on our ability to access diversified funding sources. Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

Further, our ability to raise funds by issuing debt securities from mutual funds has also been restricted, pursuant to a recent SEBI circular SEBI/HO/IMD/DF2/CIR/P/2016/35 dated February 15, 2016 ("SEBI Circular 2016"), mutual funds are required to ensure that the total exposure of debt schemes of mutual funds in a particular sector shall not exceed 25.0% of the net assets value of the scheme. The SEBI Circular 2016 also introduces group level limits for debt schemes and the ceiling be fixed at 20.0% of net assets value extendable to 25.0% of net assets value after trustee approval. This may limit our ability to raise funds from mutual funds.

Reserve Bank of India's monetary policy, changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. Scarcity of long term funds will adversely impact asset/liability profile of the company.

16. *Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, would negatively affect our net interest margin and our business.*

Our NCDs including both secured and unsecured Subordinated, are rated 'BWR AA+ (BWR Double A plus)' by BRICKWORK. Our on-going short-term debt instruments are rated 'CARE A1+' by CARE and 'BWR A1+' by BRICKWORK. Further some of our outstanding long term debt instruments are rated "CARE A+" for secured debt instruments and 'CARE A' for unsecured debt instruments by CARE. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and debt markets and, as a result, would negatively affect our net interest margin and our business. In addition, downgrades of our credit ratings could increase the

possibility of additional terms and conditions being added to any additional financing or refinancing arrangements in the future. Any such adverse development could adversely affect our business, financial condition and results of operations.

17. *In the absence of any statutory licenses in relation to our branch office(s), we may not be in a position to carry on our operations in future and that may affect our performance or we may have to face penalties and action can be taken against us by the concerned authorities for carrying on the operations without the requisite licenses.*

While we have endeavoured to obtain or apply for all applicable licenses including renewals thereof, to operate our businesses, certain licenses may have expired or are still pending before the concerned authorities or the applications for the same are yet to be made (or for renewals thereof). Such non-issuance or non-renewal may result in the interruption of our business operations and may have a material adverse effect on our results of operations and financial conditions.

18. *Payments made on the Unsecured NCDs will be subordinated to payments to secured and unsecured creditors and certain tax and other liabilities preferred by law.*

The Unsecured NCDs will be unsecured and will be subordinated to all secured and unsecured creditors of our Company as well as certain liabilities preferred by law such as to claims of the GoI on account of taxes, and certain liabilities incurred in the ordinary course of our transactions. In particular, in the event of bankruptcy, liquidation or winding-up, our assets will be available to pay obligations on the Unsecured NCDs only after all of those liabilities that rank senior to these Unsecured NCDs have been paid. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining, after paying amounts relating to these proceedings, to pay amounts due on the Unsecured NCDs. Further, there is no restriction on the amount of debt securities that we may issue that may rank above the Unsecured NCDs. The issue of any such debt securities may reduce the amount recoverable by investors in these NCDs on our bankruptcy, winding-up or liquidation

19. *Our investments can be particularly volatile and may not be recovered.*

As at December 31, 2018, as per Unaudited Financial Results prepared under IndAS our investments accounted for 21.27% of our total assets (Gross). The value of investments depends on the success and continued viability of the projects we have invested in. In addition to the project specific risks described in the above risk factors, we have limited control over the operations or management of these projects. Therefore, our ability to realize expected gains as a result of our equity interest in a project is highly dependent on factors outside of our control. Decline in value of our equity Portfolio may materially and adversely affect our business, future financial performance and results of operations.

20. *If our Company's provisioning requirements are insufficient to cover our existing or future levels of nonperforming loans or if future regulation requires us to increase our provisions, our ability to raise additional capital and debt funds as well as our results of operations and financial condition could be adversely affected.*

We are primarily governed by the RBI master directions titled "Non-Banking Financial Company – Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016" ("NBFCND-SI Directions"). Pursuant to these NBFCND-SI Directions, NBFCs such as ours are required to follow more stringent NPAs evaluation criteria. Accordingly, we are required to advance the classification of certain overdue assets as NPAs in a phased manner. Accordingly, assets are required to be classified as NPAs if they remain overdue for three months for the Financial Year 2017-18.

Though we follow stringent provisioning norms as prescribed by the RBI in the NBFCND-SI Directions, our provisioning requirements may be inadequate to cover increases in our non-performing loans. The provisioning for standard assets is required to be 0.40 % at the end of March 31, 2018 and thereafter. Our Company's gross NPAs were ₹ 5,558.20 million or 2.89% of our total assets (Gross) as of March 31, 2018, ₹ 5,588.00 million or 3.34 % of our total assets (Gross) as of March 31, 2017 and ₹ 8,042.60 million or 4.46 % of our total assets (Gross) as of March 31, 2016. Our Company's provision on NPAs was ₹ 1415.10 million as of March 31, 2018, ₹ 1,908.00 million as of March 31, 2017 and ₹ 1,653.60 million as of March 31, 2016. We cannot be sure that we will be able to improve our collections and recoveries in relation to our NPAs, or otherwise adequately control our level of NPAs in future. Moreover, as our loan portfolio matures, we may experience greater defaults in principle and /or interest repayments. Any adverse regulatory developments relating to the assessment and recognition of and provisioning for NPAs may have an adverse effect on our financial performance as our gross NPAs and net NPAs in the period are likely to increase significantly, disproportionate to the growth of our business and total loan assets.

If our provisioning requirements are insufficient to cover our existing or future levels of non-performing loans or if future regulation requires us to increase our provisions, our ability to raise additional capital and debt funds as well as our results of operations and financial condition could be adversely affected.

21. Private sector infrastructure industry in India, the sector on which we focus is still at an early stage of development and is linked to the continued growth of the Indian economy. In the event that Central and State government initiatives and regulations in the infrastructure industry do not proceed in the desired direction, or if there is any downturn in the macroeconomic environment in India or in specific sectors, our business, future financial performance and results of operations could be materially and adversely affected.

We believe that further development of India's infrastructure is dependent on formulation and effective implementation of state and central government programs and policies that facilitate and encourage private sector investment in infrastructure projects in India. Many of these programs and policies are developing and evolving and their success will depend on whether they are properly designed to address the issues facing infrastructure development in India and are effectively implemented. Additionally, these programs will need continued support from stable and experienced regulatory regimes and tax deductions that not only encourage the continued movement of private capital into infrastructure projects but also lead to increased competition, appropriate allocation of risk, transparency, effective dispute resolution and more efficient and cost-effective services to the end consumer.

The availability of private capital and continued growth of the infrastructure industry are also linked to the continued growth of the Indian economy. Specific factors within each industry sector may also influence the success of the projects within those sectors, including changes in policies, regulatory frameworks and market structures. While initiatives have been taken by Central Government or State Government in Infrastructure sectors, the implementation of these policies requires adequate funding as well as long time. Further, since infrastructure services in India have historically been provided by the central and state governments without charge or at a subsidized charge to consumers, the growth of the infrastructure industry will be impacted by consumers' income levels and the extent to which they would be willing to pay or can be induced to pay for infrastructure services. If the central and state governments' initiatives and regulations in the infrastructure industry do not proceed in the desired direction, or if there is any downturn in the macroeconomic environment in India or in specific sectors, our business, our future financial performance and results of operations could be materially and adversely affected.

22. Most of the supporting documents in connection with the biographies of the directors included in the section "Our Management" and certain litigation against our company included in the section "Outstanding Litigation and Statutory Defaults" of this Shelf Prospectus are unavailable.

Certain documents supporting the information included in this Shelf Prospectus with respect to previous work experience of the few Directors, disclosed in the sections titled "Our Management" and/or "Outstanding Litigation and Statutory Defaults" may not be available and are based on undertakings taken from each of the Directors. Though the Company and its Directors have disclosed the information in this Shelf Prospectus as per applicable law, failure to provide any such supporting documents under any regulatory or statutory law, might have some reputational impact on the Directors of the Company.

23. Companies operating in India are subject to a variety of central and state government taxes and surcharges.

The Government of India has recently implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combines multiple taxes and levies by the Central and State Governments into a unified tax structure. The implementation of this rationalised tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. This may affect our financial condition and results of operation.

The statutory corporate income tax in India, which includes a surcharge on the tax and an education cess on the tax and the surcharge, is currently 34.60 %. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations

24. We face asset-liability mismatches which could affect our liquidity and consequently may adversely affect our operations, profitability and/or cash flows.

We face potential liquidity risks due to varying periods over which our assets and liabilities mature. As is typical for NBFCs, a portion of our funding requirements is met through short-term funding sources such as bank loans, working capital demand loans, cash credit, short term loans and commercial papers. Consequently, our inability to obtain additional credit facilities or renew our existing credit facilities, in a timely and cost-effective manner or at all, may lead to mismatches between our assets and liabilities, which in turn may adversely affect our operations, financial performance and/or cash flows. Further, mismatches between our assets and liabilities are compounded in case of pre-payments of the financing facilities we grant to our customers.

25. Some of our Directors may have interests in entities, which are in businesses similar to ours and this may result in conflicts of interest with us.

As on the date of this Shelf Prospectus, some of our Directors namely, Mr. Hemant Kanoria and Mr. Sunil Kanoria and Mr. Shyamalendu Chatterjee, have interests in entities that are engaged in businesses similar to ours.

Mr. Hemant Kanoria and Mr. Sunil Kanoria are currently the Chairman and Vice Chairman (Non-Executive), respectively of SEFL, our Promoter. Mr. Shyamalendu Chatterjee, who is an independent director of our Company is also an independent director of SEFL, our Subsidiary, which is an asset finance company.

None of the abovementioned companies is in the same line of business as our Company, i.e., infrastructure financing.

Further, in the event the Board is considering a matter which raises an issue of conflict of interest for one of the Directors, in view of their other directorship(s), such Director does not participate in the proceedings of the Board while such matter is being considered in terms of Section 166(4) of the Companies Act, 2013.

Commercial transactions in the future between us and related parties may result in conflicting interests which could have an adverse effect on our operations. Further there is no assurance that our Directors will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in future. Such factors may have an adverse effect on the results of our operations and financial condition.

26. We have experienced negative cash flows in the past and may experience negative cash flows in the future. Such negative cash flows in the future could adversely affect our results of operation and financial conditions.

The following table sets forth our cash flow for the periods indicated as below:

(₹ in million)

Sl. No.	Particulars	Fiscal 2018	Fiscal 2017	Fiscal 2016
1.	Net cash (used in)/ generated from operating activities	(10,615.30)	(5,432.50)	(9,867.60)
2.	Net cash (used in)/ generated from investing activities	3401.10	10,313.00	119.80
3.	Net cash (used in)/ generated from financing activities	7,558.40	(14,453.90)	8728.90
4.	Cash and cash equivalents at the beginning of the period/year	2,774.70	1,186.10	2,205.00
5.	Cash and cash equivalents at the end of the period/year	3,118.90	2,774.70	1,186.10

For further information, see the section titled “Financial Information” on page no. 242 of this Shelf Prospectus. We cannot assure you that our net cash flows will be positive in the future.

27. Some of our Subsidiaries have incurred losses in the recent past.

Some of our Subsidiaries including step-down subsidiaries and Associates have incurred losses in recent fiscals. Total losses incurred by Subsidiaries including Associates on March 31, 2018, March 31, 2017 & March 31, 2016, for the year ended March 31, 2018, March 31, 2017 and March 31, 2016 were ₹174.20 mn, ₹165.90 mn and ₹539.80 mn respectively excluding the adjustment for minority interest as per Accounting Standard 21 under IGAAP. There can be no assurance that any of our other Subsidiaries and Associates as on date of this Shelf Prospectus, will not incur losses in future periods or that there will not be an adverse effect on our Company’s reputation or business as a result of such losses.

28. Our business is heavily dependent on our operations in certain regions in India, and any adverse changes in the conditions affecting those regions can adversely impact our business, financial condition and results of operations.

Our Company is dependent on the state of West Bengal and the union territory of Delhi with 51% of our outstanding loans as of March 31, 2018 arising from these geographical regions.

In the event of a regional slowdown in the economic activity in these regions or factors such as a slowdown in the infrastructure sector in these regions, we may experience more pronounced effects on our financial condition and results of operations. Our business, financial condition and results of operations have been and will continue to be largely dependent on the performance of, and the prevailing conditions affecting, the economy in these regions. Therefore, any significant social, political or economic disruption, or natural calamities or civil disruptions in these regions, or changes in the policies in these regions may affect our business operations, require us to incur additional expenditure and change our business strategies.

29. Significant differences exist between Indian GAAP used to prepare our Company’s financial statements and other accounting principles, such as Indian Accounting Standards (IndAS), with which investors may be more familiar.

Our Company’s Reformatted Financial Statements included in this Shelf Prospectus are derived from financial statements prepared in conformity with Indian GAAP. Indian GAAP differs in certain significant respects from IndAS and other accounting principles and standards. If our Company were to prepare its financial statements in

accordance with such other accounting principles, our Company's results of operations, cash flows and financial condition may be substantially different. The significant accounting policies applied in the preparation of its Indian GAAP financial statements are set forth in the notes to the Reformatted Financial Statements included in this Shelf Prospectus. Prospective investors should review the accounting policies applied in the preparation of our Company's Reformatted Financial Statements summarised in the section "*Financial Information*" on page no 242 of this Shelf Prospectus and "*Summary of Significant Differences between Indian GAAP and IndAS*" beginning on page 217 of this Shelf Prospectus, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Accordingly, the degree to which the Reformatted Financial Statements included in this Shelf Prospectus will provide meaningful information is entirely dependent on the investor's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Shelf Prospectus should accordingly be limited.

The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with IndAS. All NBFCs having a net worth of more than Rs. 5,000 million are required to mandatorily adopt IndAS for the accounting period beginning from 1 April 2018 with comparatives for the period ending on 31 March 2018.

As there is not yet a significant body of established practice, such as interpretations of the new accounting standards, on which to draw in forming judgments regarding the new system's implementation and application, our Company has not determined with any degree of certainty the impact such adoption will have on its financial reporting.

As a result, there can be no assurance that our Company's financial condition, results of operations, cash flows or changes in shareholders' equity will not appear materially worse under IndAS than under Indian GAAP. Our Company's management may also have to divert significant time and additional resources in order to implement IndAS on a timely and successful basis. Moreover, there is increasing competition for the small number of IndAS experienced accounting personnel available as more Indian companies begin to prepare IndAS financial statements. There can be no assurance that our Company's adoption of IndAS will not adversely affect its reported results of operations or financial condition in the future.

30. As a consequence of being regulated as an NBFC and IFC, and a PFI, we have to adhere to certain individual and borrower group Exposure limits under the RBI regulations.

Our Company is regulated by the RBI as an NBFC. In terms of the Master Direction – Non-Banking Financial Company-Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Direction, 2016 our Company is required to comply with the prescribed Exposure limits. Further, our Company has been classified as an IFC by the RBI, which classification is subject to certain conditions including a minimum 75% of the total assets of such NBFC being deployed in infrastructure loans (as defined under the Prudential Norms Directions), net owned funds of ₹3,000 million or more, a minimum credit rating of "A" or an equivalent credit rating of CRISIL, India Ratings, CARE or ICRA or any other accredited rating agency and a capital to risk weighted asset ratio of 15%. As an IFC, our Company's single borrower limit for lending may exceed the concentration of credit norms applicable to an NBFC that is not an IFC by an additional 10% of its owned fund, and its single group limit for lending may exceed such credit norms by an additional 15% of its owned fund.

The MCA, through its notification dated September 26, 2011, published in the Official Gazette of India notified our Company, as a Public Financial Institution under Section 4A of the Companies Act 1956 (now Section 2(72) of the 2013 Act). As a result of the PFI status, we are required to undertake certain continuing compliances such as the main business of our Company should be industrial/ infrastructural financing, the financial statement should show that its income from industrial/ infrastructural financing exceeds 50% of its income; and the net-worth of our Company should be at least ₹10,000 million.

In the event that our Company is unable to comply with the Exposure norms within the specified time limit, or at all, our Company may be subject to regulatory actions by the RBI including the levy of fines or penalties and/or the cancellation of registration as an NBFC, IFC or PFI. Our Company's inability to continue being classified as an IFC and PFI may impact our growth and expansion plans by affecting our competitiveness in relation to our competitors. We cannot assure you that we may not breach the Exposure norms in the future. Any levy of fines or penalties or the cancellation of our registration as an NBFC or IFC by the RBI due to the breach of Exposure norms may adversely affect our business, prospects, results of operations, financial condition and the trading price of the NCDs.

Given the extensive regulation of the financial services industry, it is possible that we could be found, by a court, arbitration panel or regulatory authority not to have complied with applicable legal or regulatory requirements. Further, we may be subject to lawsuits or arbitration claims by customers, employees or other third parties in the different state jurisdictions in India in which we conduct our business. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims that we have not complied, with any of these conditions, our certificate of

registration may be suspended or cancelled and we shall not be able to carry on such activities. We may also incur substantial costs related to litigation if we are subject to significant legal action, which may materially and adversely affect our business, future financial performance and results of operations.

31. *We may not be able to renew or maintain our regulatory approvals, licences and registration under applicable laws as required to carry our business in normal course, which may adversely affect our business operations and financial profitability.*

Our Company being a NBFC-ND-SI registered with RBI, require certain approvals, licenses, registrations and permissions for operating our business, including registration with the RBI as an NBFC-ND. In addition, the RBI has classified our Company as an IFC. Further, we have been notified as a PFI under section 4A of the Companies Act 1956 (Section 2(72) of 2013 Act). Such approvals, licenses, registrations and permissions must be maintained/renewed over time, we may have to comply with certain conditions in relation to these approvals, applicable requirements may change and we may not be aware of or comply with all requirements all of the time. We are required to obtain and maintain a certificate of registration for carrying on business as an NBFC that is subject to numerous conditions. For further details, see the section titled “**Regulations and Policies**” on page no. 207 of this Shelf Prospectus and the chapter titled “**Regulations and Policies**” beginning on page no. 207 of this Shelf Prospectus.

32. *We have entered into certain related party transactions.*

We have entered into certain transactions with related parties as disclosed in our Financial Information. There can be no assurance that we could not have achieved more favourable terms on such transactions had they not been entered into with related parties as disclosed in the accounts. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. Such transactions we have entered into and any future transactions with our related parties could potentially involve conflicts of interest. For more information regarding our related party transactions, see the section titled “**Financial Statements**” for “Related Party Disclosure” on page no. F-68 of this Shelf Prospectus.

33. *Material changes in the regulations that govern us and our borrowers could cause our business to suffer.*

We are regulated by the Companies Act 2013, which replaced Companies Act 1956, and some of our activities are subject to supervision and regulation by statutory authorities including the MCA, RBI, SEBI and Stock Exchange(s). Further, we are subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles. Being notified as a Public Financial Institution under Section 4A of the Companies Act 1956 (now Section 2(72) of the 2013 Act), we are entitled to certain benefits under the Companies Act, 2013, Recovery of Debts due to Banks and Financial Institutions Act, 1993 and Income Tax Act, 1961. The laws and regulations governing us could change in the future and any such changes could adversely affect our business, our future financial performance, by requiring a restructuring of our activities, which may impact our results of operations. As we are in the business of infrastructure financing, major categories of our borrowers are companies, Body Corporates, Partnership firms etc. and they are also registered entities within the meaning of different applicable laws in India. These borrowers are also regulated and supervised by the statutory authorities. Any change in such regulations, may affect the ease of doing business of these borrowers, which could certainly impact our business and future financial performance.

34. *Our insurance coverage may not adequately protect us against losses and in case they exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

35. *A failure of our operational systems or infrastructure, or those of third parties, could impair our liquidity, disrupt our businesses, cause damage to our reputation and result in losses.*

Our business is highly dependent on our ability to process a large number of transactions. Our financial, accounting, data processing or other operating systems and facilities may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, adversely affecting our ability to process these transactions. As we grow our business, the inability of our systems to accommodate an increasing volume of transactions could also constrain our ability to expand our businesses. Additionally, shortcomings or failures in our internal processes or systems could lead to an impairment of our financial condition, financial loss, disruption of our business and reputational damage.

Our failure to maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations.

We may also be subject to disruptions of our operating systems, arising from events that are wholly or partially beyond our control including, for example, computer viruses or electrical or telecommunication service disruptions, which may result in a loss or liability to us.

36. *We may be required to increase our capital ratio or amount of reserve funds, which may result in changes to our business and accounting practices that may materially and adversely affect our business and results of operations.*

We are subject to the RBI's minimum capital to risk weighted assets ratio norms. Pursuant to Section 45 -IC of the RBI Act, every NBFC is required to create a reserve fund and transfer thereto a sum not less than 20% of its net profit every year, as disclosed in the profit and loss account and before any dividend is declared. Our Company has been designated an Infrastructure Finance Company as from March 31, 2011 and as such, must maintain a capital to risk-weighted asset ratio of 15%, out of which 10% should be represented by Tier I capital.

As on March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015 and March 31, 2014 our Company's total capital to risk-asset ratio was 17.60%, 18.94%, 17.54%, 16.97% and 17.78% respectively.

The RBI may also in the future require compliance with other financial ratios and standards and/or may make the existing requirements more stringent. Compliance with such regulatory requirements in the future may require us to alter our business and accounting practices or take other actions that could materially and adversely affect our business and operating results.

37. *We are affected by volatility in interest rates for both our lending and treasury operations, which could cause our net interest income to decline and adversely affect our return on assets and profitability.*

Our business is dependent on interest income from the loans we disburse. Accordingly, we are affected by volatility in interest rates in our lending operations. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility.

If interest rates rise, we may have greater difficulty in maintaining a low effective cost of funds compared to our competitors which may have access to low-cost deposit funds. Further, in case our borrowings are linked to market rates, we may have to pay interest at a higher rate as compared to other lenders. Fluctuations in interest rates may also adversely affect our treasury operations. In a rising interest rate environment, especially if the rise were sudden or sharp, we could be adversely affected by the decline in the market value of our securities Portfolio and other fixed income securities. In addition, the value of any interest rate hedging instruments we may enter into in the future would be affected by changes in interest rates.

When interest rates decline, we are subject to greater repricing and prepayment risks as borrowers take advantage of the attractive interest rate environment. When assets are repriced, our spread on our loans, which is the difference between our average yield on loans and our average cost of funds, could be affected. During periods of low interest rates and high competition among lenders, borrowers may seek to reduce their borrowing cost by asking lenders to reprice loans. If we reprice loans, our results may be adversely affected in the period in which the repricing occurs. If borrowers prepay loans, the return on our capital may be impaired as any prepayment premium we receive may not fully compensate us for the redeployment of such funds elsewhere.

38. *In addition to our Rupee borrowings and financial activities, we currently have foreign currency borrowings as well as financing activities, which are likely to continue or increase in the future, which will expose us to fluctuations in foreign exchange rates, which could adversely affect our financial condition.*

As at December 31, 2018, our aggregate foreign currency borrowings amounted to USD 30.00 million and EURO 29.87 million, comprising 3.29% of our aggregate borrowings as at that date. We may seek to obtain additional foreign currency borrowings in the future. We are therefore affected by adverse movements in foreign exchange rates. While we seek to hedge foreign currency exposures, there can be no assurance that our hedging policies and mechanisms will remain effective or that we will enter into effective hedging with respect to any new foreign currency borrowings. To the extent we increase our foreign currency borrowing in the future, we may be further exposed to fluctuations in foreign currency rates. Volatility in foreign exchange rates could adversely affect our business, prospects, results of operations and financial condition. Further, adverse movement of foreign exchange rates may also affect our borrowers negatively, which may in turn adversely affect the quality of our exposure to these borrowers

39. *Our success depends in large part upon our management team and skilled personnel and our ability to attract and retain such persons.*

Our future performance will be affected by the continued service of our management team and skilled personnel. We also face a continuing challenge to recruit and retain a sufficient number of suitably skilled personnel, particularly as we continue to grow. There is significant competition for management and other skilled personnel in the various segments of the financial services industry in which we operate, and it may be difficult to attract and retain the personnel we need in the future. The loss of key personnel may have a material and adverse effect on our business, future financial performance, results of operations and ability to grow in line with our strategy and future plans.

40. *Our results of operations could be adversely affected by any disputes with our employees.*

Currently, none of our employees are members of any labour union. While we believe that we maintain good relationships with our employees, there can be no assurance that we will not experience future disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

41. *We are exposed to various operational risks, including the risk of fraud and other misconduct by employees or outsiders.*

As with other financial intermediaries, we are exposed to various operational risks such as fraud or misconduct by our employees or by an outsider, unauthorized transactions by employees or third parties, misreporting of and non-compliance with various statutory and legal requirements and operational errors. It may not always be possible to deter employees from or otherwise prevent misconduct or misappropriation of cash collections, and the precautions we take to detect and prevent these activities may not always be effective. Any instance of employee misconduct, fraud or improper use or disclosure of confidential information could result in regulatory and legal proceedings which if unsuccessfully defended, could materially and adversely affect our business, future financial performance and results of operations.

42. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our financial accounting and information technology systems. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services.

Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and/or sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of products.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security.

Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner or at all could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

43. *Our ability to assess, monitor and manage risks inherent in our business differs from the standards of some of our counterparts in India and in some developed countries.*

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, currency risk, operational risk and legal risk that we encounter in our business and operations. While we have various risk management policies and procedures, there can be no assurance that such policies and procedures are as comprehensive as those implemented by banks and other financial institutions. Our risk management policies and procedures are based, among other considerations, information regarding borrowers, and market knowledge. The effectiveness of our Company's risk management is limited by the quality and timeliness of available data. Consequently, these policies and procedures may not predict future risk exposures that could vary from or be greater than that indicated by historical measures. In addition, information available to us may not be accurate, complete, up-to-date or properly evaluated. Some of our risk management systems are not automated and are subject to human error.

Our risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon RBI's ALM Guidelines for NBFCs. Other risk management methods depend upon our internal risk

management policies and principles evolved by our management. Although we have established these policies and procedures, they may not be fully effective.

44. *We are subject to credit, market and liquidity risks and, if any such risk were to materialise, our credit ratings and our cost of funds may be adversely affected.*

We may not be able to effectively mitigate our risk exposures in particular market environments or against particular types of risks. Our revenues and market risk are dependent upon our ability to properly identify, and mark to market, changes in the value of financial instruments caused by changes in market prices or rates. Our earnings are dependent upon our effectiveness in managing credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses. To the extent our assessments, assumptions or estimates prove inaccurate or are not predictive of actual results, we could incur higher than anticipated losses. The successful management of credit, market and operational risk is an important consideration in managing our liquidity risk because it affects the evaluation of our credit ratings by rating agencies.

Further, the cost and availability of capital is also dependent on our short-term and long-term credit ratings. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations and if these are downgraded it would have an adverse impact on our ability to cost effectively access funds. Downgrading in our credit rating could cause our lenders to impose additional terms and conditions to any financing or refinancing arrangement that we enter into in the future.

45. *We are subject to certain conditions and restrictions in terms of our financing arrangements, which restrict our ability to conduct our business and operations in the manner we desire. Further, our inability to meet our obligations, including financial covenants, could adversely affect our business and results of operations.*

As of December 31, 2018, our Company had total borrowing of 136,397.78 million, and we will continue to incur additional indebtedness in the future as per IndAS.

Some of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. Specifically, under some of our financing agreements, we require, and may be unable to obtain, consents from the relevant lenders for, among others, the following matters: change in the capital structure of our Company or management; formulating any scheme for merger, amalgamation or re-organization; entering into any borrowing or non-borrowing arrangements; either secured or unsecured; with any other lender or financial institution; creating or forming a subsidiary of our Company; undertaking guarantee obligations on behalf of any other company, firm or person, including in certain cases; and making any fundamental changes such as the financial year of our Company. In addition, under certain facility agreements and sanction letters, the facilities availed of by our Company, are repayable on demand. These covenants vary depending on the requirements of the financial institution extending the loan and the conditions negotiated under each financing document. Such covenants may restrict or delay certain actions or initiatives that we may propose to take from time to time.

A failure to observe the covenants under our financing arrangements or to obtain necessary consents required thereunder may lead to the termination of our credit facilities, acceleration of all amounts due under such facilities and the enforcement of any security provided. Any acceleration of amounts due under such facilities may also trigger cross default provisions under our other financing agreements. If the obligations under any of our financing documents are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. In addition, other third parties may have concerns over our financial position and it may be difficult to market our financial products. Any of these circumstances could adversely affect our business, credit rating and financial condition and results of operations. Moreover, any such action initiated by our lenders could result in the price of the Equity Shares being adversely affected.

46. *Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance and results of operations.*

We are dedicated to earning and maintaining the trust and confidence of our customers; and we believe that the good reputation created thereby and inherent in the "Srei" brand name is essential to our business. As such, any damage to our reputation, or that of the "Srei" brand name, could substantially impair our ability to maintain or grow our business. In addition, any action on the part of any of the Srei Group companies that negatively impact the "Srei" brand could have a material and adverse effect on our business, future financial performance and results of operations.

47. *As an infrastructure lending institution, notified as a PFI, we are eligible for certain tax benefits. These benefits may become unavailable as per future regulatory guidelines, which may affect our profits.*

Company is eligible for certain tax benefits as a PFI under the Income Tax Act. We cannot assure you that we would continue to be eligible for such tax benefits in the future as per future regulatory guidelines. If the laws or regulations regarding the tax benefits applicable to us were to change, our taxable income and tax liability may increase, which would adversely affect our financial results.

We have filed tax returns with various tax departments which are pending for assessment. There is a possibility that the tax department may impose additional tax liability on our Company upon completion of these assessments. We cannot assure you that the tax department will not initiate further scrutiny, investigation or regulatory action or reopen assessments for previous years. Any adverse finding by the tax department would have a material adverse effect on our reputation, business, operations and financial conditions.

48. *We have not independently verified certain data in this Shelf Prospectus.*

We and/or the Lead Managers have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, the Indian economy, as well as NBFCs, the infrastructure finance industry, that are included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

49. *Our Company may not be able to identify suitable joint venture or strategic partners or our Company may not be able to complete transactions on terms commercially acceptable to our Company, or may not be able to complete transactions at all.*

Our Company intends to continue to pursue suitable joint venture and strategic partnership opportunities in India, in particular with companies/firms whose resources, capabilities and strategies are likely to enhance and diversify our Company's business operations. Our Company may not be able to identify suitable joint venture or strategic partners or our Company may not complete transactions on terms commercially acceptable to our Company, or may not complete transactions at all. Our Company may not be able to successfully form such alliances and ventures or realise the anticipated benefits of such alliance and joint ventures. Furthermore, such partnerships may be subject to regulatory approvals, which may not be received in a timely manner, or may not be received at all. In addition, our Company's expected strategic benefits or synergies of any future partnerships may not be realised. Furthermore, such investments in strategic partnerships may be long term in nature and may not yield returns in the short to medium term. Such initiatives will place significant strains on our Company's management, financial and other resources and any unforeseen costs or losses could adversely affect its business, profitability and financial condition.

50. *We may experience difficulties in expanding our business into new sectors and other geographical regions.*

We continue to evaluate attractive growth opportunities to expand our business into new sectors and other geographical regions. Factors such as competition, regulatory, business practices and requirements in these new sectors and geography may differ from those in our current markets and our experience in our existing sectors and geography. Our business may be exposed to various additional challenges including obtaining necessary governmental approvals, identifying and collaborating with local business and partners with whom we may have no previous working relationship; successfully gauging market conditions in those geography where we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions and results of operations.

51. *We do not own some of our branch offices. Any termination or failure on our part to renew our Lease/Rent Agreements in a favourable, timely manner, or at all, could adversely affect our business and results of operations. Moreover, many of the lease/rent agreements entered into by our Company may not be duly registered or adequately stamped.*

Some of the lease/rent agreements of our branch offices may have expired and we may be currently involved in negotiations for the renewal of these lease/rent agreements. If these lease/rent agreements are not renewed or renewed on unfavourable to us, we may suffer a disruption in our operations or increased costs, or both, which may affect our business and results of operations.

Further, most of our lease/rent agreements may not be adequately stamped or duly registered. Unless such documents are adequately stamped or duly registered, such documents may be rendered inadmissible as evidence in a court in India or may not be authenticated by any public officer and the same may attract penalty as prescribed under applicable law or may impact our ability to enforce these agreements legally, which may result in an adverse effect on the continuance of the operations and business of our Company.

52. *We may not be able to detect money-laundering and other illegal or improper activities fully or on a timely basis, which could expose us to additional liability and harm our business or reputation.*

We are required to comply with applicable anti-money-laundering (“AML”) and anti-terrorism laws and other regulations in India. In the ordinary course of our operations, we run the risk of failing to comply with the prescribed KYC procedures and the consequent risk of fraud and money laundering by dishonest customers and assessment of penalties or imposition of sanctions against us for such compliance failures despite having implemented systems and controls designed to prevent the occurrence of these risks. Although we believe that we have adequate internal policies, processes and controls in place to prevent and detect any money-laundering activity and ensure KYC compliance, there can be no assurance that these will be effective in all instances. We may accordingly be subject to regulatory actions including imposition of fines and other penalties by the RBI and other relevant governmental authorities to whom we report. For instance, in certain of its past inspection reports, the RBI has made observations in relation to absence of an independent evaluation of controls to identify high value transactions to be carried out by internal audit department as per KYC/AML requirements. If any party uses or attempts to use us for money laundering or any other illegal or improper purposes and such attempts are not detected or reported to the appropriate authorities in compliance with the applicable legal requirements, our reputation could suffer and could result in a material adverse effect on our business, financial condition, reputation and results of operations.

53. *We are required to comply with various financial and other covenants under the loan agreements that we are a party to. If we are not in compliance with the covenants contained in such loan agreements, including obtaining the relevant consents from our lenders for the Issue, our lenders could accelerate their respective repayment schedules, and enforce their respective security interests, which would lead to an adverse effect on our business, results of operations and financial condition.*

We are required to comply with various financial and other covenants under the loan agreements that we are a party to, including but not limited to, amongst other things, obtaining, wherever applicable, prior consents from our existing lenders for further borrowings, including undertaking this Issue, maintenance of financial ratios and for creation of encumbrances over certain of our assets. If our Company proceeds with the Issue without the consents of lenders wherein specifically required, the same may constitute an event of default by our Company under the relevant financing documents in which case the concerned lenders shall have the right to inter alia enforce remedies under the terms of the relevant financing documents, which includes without limitation, acceleration of repayment of the outstanding amounts, enforcement of security interests and taking possession of assets given as security. Further, such an event of default could also trigger a cross-default under certain other financing documents of our Company, or any other agreements or instruments of our Company containing a cross-default provisions, which may have a material adverse effect on our Company including our financial position and credit rating.

We have duly applied to all the lenders of our Company for their respective consents to include their name in the Prospectus. As on the date of this Shelf Prospectus, we are yet to receive consents from some of the lenders of our Company for inclusion of their names and relevant details in this Shelf Prospectus. In the event our Company fails to obtain such lenders’ consents for inclusion of their names prior to opening of the Issue, such lenders may initiate any penalty or other actions, which might impact the existing financial credit facilities or cash flow of the Company. Consequently, our Company may have to dedicate a substantial portion of its cash flow from operations to make payments under the financing documents, thereby reducing the availability of its cash flow to meet its working capital requirements and use for other general corporate purposes. If the lenders holding substantial part of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts upon such debts falling due for repayment at once.

Risks Associated with the NCDs

1. *There is no guarantee that the NCDs issued pursuant to this Issue will be listed on BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permissions for listing and trading of the NCDs issued pursuant to this Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of NCDs to be submitted. There could be a failure or delay in listing the NCDs on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict an investor’s ability to trade in the NCDs.

2. *Payments to be made on the NCDs will be subordinated to certain tax and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs*

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company’s assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to these NCDs have been paid as per Section 327 of the 2013 Act. In the

event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

3. *Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders.*

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the NCD holders will rank pari passu inter se. However, the NCDs being unsecured and subordinated in nature, our secured borrowings shall rank above the NCDs. Additionally, issuance of any such debt securities may reduce the amount recoverable.

4. *You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs.*

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors inter-alia including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner, or at all.

5. *There is no active market for the NCDs on the stock exchanges. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.*

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors inter alia including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and, (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

6. *There are certain risks in connection with the Unsecured NCDs.*

The Unsecured NCDs will be in the nature of Subordinated Debt and hence the claims of the holders thereof will be subordinated to the claims of other secured and other unsecured creditors of our Company. Further, since no charge upon the assets of our Company would be created in connection with the Unsecured NCDs, in the event of default in connection therewith, the holders of Unsecured NCDs may not be able to recover their principal amount and/or the interest accrued thereon in a timely manner, for the entire value of the Unsecured NCDs held by them or at all. Accordingly, in such a case the holders of the Unsecured NCDs may lose all or a part of their investment therein. Further, the payment of interest and the repayment of the principal amount before the due maturity in connection with the Unsecured NCDs would be subject to the requirements of RBI, which may also require our Company to obtain prior approval from the RBI in certain circumstances.

7. *Debenture Redemption Reserve would be created up to an extent of 25% of the outstanding NCDs and if we are unable to generate adequate profits, we may not be able to provide for the DRR even to the extent of the stipulated 25 per cent.*

The Companies (Share Capital and Debentures) Rules, 2014 inter alia provides as follows:

- the Debenture Redemption Reserve shall be created out of the profits of the company available for payment of dividend;
- the company shall create Debenture Redemption Reserve equivalent to at least twenty five percent of the amount raised through the debenture issue before debenture redemption commences.

The said Companies (Share Capital and Debentures) Rules, 2014 further provides that the amount credited to the Debenture Redemption Reserve shall not be utilised by the company except for the purpose of redemption of debentures.

Therefore, our Company will be maintaining Debenture Redemption Reserve to the extent of 25 per cent of the outstanding NCDs issued and the NCD Holders may find it difficult to enforce their interests in the event of or to the extent of a default. In the case we are unable to generate adequate profits; we may not be able to provide for the DRR even to the extent of the stipulated 25 per cent.

As per Companies (Share Capital and Debentures) Rules, 2014, every company required to create or maintain DRR shall before the 30th day of April of each year, deposit or invest, as the case may be, a sum which shall not be less than 15.00% of the amount of its debentures maturing during the year ending on the 31st day of March, following any one or more of the following methods, namely:(a) in deposits with any scheduled bank, free from charge or lien

(b) in unencumbered securities of the Central Government or of any State Government; (c) in unencumbered securities mentioned in clauses (a) to (d) and (ee) of Section 20 of the Indian Trusts Act, 1882; (d) in unencumbered bonds issued by any other company which is notified under clause (f) of Section 20 of the Indian Trusts Act, 1882. The amount deposited or invested, as the case may be, shall not be utilized for any purpose other than for the repayment of debentures maturing during the year referred to above, provided that the amount remaining deposited or invested, as the case may be, shall not at any time fall below 15% of the amount of debentures maturing during the 31st day of March of that year. This may have a bearing on the timely redemption of the NCDs by our Company.

8. *Any downgrading in credit rating of our NCDs may affect the trading price of the NCDs.*

The NCDs proposed to be issued under this Issue have been rated “BWR AA+ (BWR Double A Plus)” from BRICKWORK. We cannot guarantee that these ratings will not be downgraded. The ratings provided by BRICKWORK may be suspended, withdrawn or revised at any time. Any revision or downgrading in the above credit ratings may lower the trading price of the NCDs and may also affect our Company’s ability to raise further debt.

9. *Changes in interest rates may affect the price of our Company’s NCDs.*

All securities where a fixed rate of interest is offered, such as our Company’s NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our Company’s NCDs.

10. *There may be a delay in making refunds to Applicants.*

We cannot assure you that the monies refundable to you, on account of (a) withdrawal of your Applications, (b) withdrawal of the Issue, or (c) failure to obtain the final approval from the Stock Exchanges for listing of the NCDs, or (d) rejection of Application on technical grounds, will be refunded to you in a timely manner. We, however, shall refund such monies, with the interest due and payable thereon, as prescribed under applicable statutory and/or regulatory provisions.

11. *The NCDs are subject to the risk of change in law.*

The terms and conditions of the NCDs are based on Indian law in effect as of the date of issue of the relevant NCDs. No assurance can be given as to the impact of any possible judicial decision or change to Indian law or administrative practice after the date of issue of the relevant NCDs and any such change could materially and adversely impact the value of any NCDs affected by it.

EXTERNAL RISKS

Risks Relating to India

1. *Governmental and statutory regulations, including the imposition of an interest rate ceiling, may adversely affect our operating results and financial position.*

As a non-deposit taking NBFC, our Company is subject to regulation by Indian governmental authorities, including the RBI. These laws and regulations impose numerous requirements on us, including asset classifications and prescribed levels of capital adequacy, cash reserves and liquid assets. There may be future changes in the regulatory system or in the enforcement of the laws and regulations that could adversely affect us.

For instance, a number of states in India have enacted laws to regulate money lending transactions. These state laws establish maximum rates of interest that can be charged by a person lending money. For unsecured loans, these maximum rates typically range from 20.0% to 24.0% per annum and are subject change to from time to time. Currently, the RBI requires that the board of all NBFCs adopt an interest rate model taking into account relevant factors such as the cost of funds, margin and risk premium. It is unclear whether NBFCs are required to comply with the provisions of state money lending laws that establish ceilings on interest rates. In October 2004, the Honourable High Court at Calcutta observed that Bengal Money Lender’s Act, 1940 applies to NBFCs. However, in January 2010, the High Court of Gujarat held that the provisions of the RBI Act have an overriding effect upon state money lending laws. The subject matter is pending before the Supreme Court of India in a different case and the final decision has not been passed.

In the event that the Supreme Court of India and/or the government of any state in India requires us to comply with the provisions of their respective state money lending laws, or imposes any penalty against us, our Directors or our officers, including for prior non-compliance, our business, future financial performance and results of operations may be materially and adversely affected.

2. *Political instability or changes in the Government in India or in the Government of the states where we operate could cause us significant adverse effects.*

We are incorporated in India and all of our operations, assets and personnel are located in India. Consequently, our performance and the market price and liquidity of our NCDs may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The central government has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business is also impacted by regulation and conditions in the various states in India where we operate. Our business, and the market price and liquidity of our NCDs may be affected by interest rates, changes in central government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive central governments have pursued policies of economic liberalization and financial sector reforms. However, there can be no assurance that such policies will be continued. A significant change in the central government's policies could adversely affect our business, financial condition and results of operations and could cause the price of our NCDs to decline.

3. ***Regional hostilities, terrorist attacks, civil disturbances or social unrest, regional conflicts could adversely affect the financial markets and the trading price of our NCDs could decrease.***

Certain events that are beyond our control, such as terrorist attacks and other acts of violence or war, may adversely affect worldwide financial markets and could potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India's economy.

India has also experienced social unrest in some parts of the country. If such tensions occur in other parts of the country leading to overall political and economic instability, it could have a materially adverse effect on our business, future financial performance, results of operations and the trading price of the NCDs.

4. ***Our growth depends on the sustained growth of the Indian economy. An economic slowdown in India and abroad could have a direct impact on our operations and profitability.***

Macroeconomic factors that affect the Indian economy and the global economic scenario have an impact on our business. The growth in our business is primarily driven by the need for financing infrastructure development. Any slowdown in the Indian economy may have a direct impact on the growth in our business and a slowdown in the economy as a whole can increase the level of defaults thereby adversely impacting our Company's profitability and growth plans.

5. ***Our growth depends on our ability to handle risks associated with our business some of which are beyond our control and if they materialize, could have a material and adverse effect on our business, future financial performance and results of operations.***

Some of the risks associated with our business are generally beyond our control and include:

1. political, regulatory and legal actions that may adversely affect project viability;
2. interruptions or disruption in domestic or international financial markets, whether for equity or debt funds;
3. changes in government and regulatory policies;
4. delays in the construction and operation of infrastructure projects;
5. adverse changes in market demand or prices for the products or services that the project, when completed, is expected to provide;
6. the unwillingness or inability of consumers to pay for infrastructure services;
7. shortages of, or adverse price developments in respect of raw materials and key project inputs such as oil and natural gas;
8. potential defaults under financing arrangements with lenders and investors;
9. failure of third parties to perform on their contractual obligations;
10. adverse developments in the overall economic environment in India;
11. interest rate or currency exchange rate fluctuations or changes in tax regulations;
12. economic, political and social instability or occurrences such as natural disasters, armed conflict and terrorist attacks, particularly where projects are located or in the markets they are intended to serve.

If any of the above risks materialize, it may have an adverse effect on our business, future financial performance and results of operations.

6. ***Any downgrading of India's debt rating by an international rating agency could have a negative impact on the trading price of the NCDs.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, its ability to obtain financing for capital expenditures and the trading price of the NCDs.

7. ***Trading of the NCDs may be limited by temporary exchange closures, broker defaults, settlement delays, strikes by brokerage firm employees and disputes.***

The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

8. ***Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.***

As an NBFC, we are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties in recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises, because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, is sometimes referred to as “systemic risk”. There has been a trend towards consolidation with weaker banks and NBFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders’ funds and the market price of our NCDs.

9. ***The bankruptcy code in India may affect our rights to recover loans from borrowers.***

The Insolvency and Bankruptcy Code, 2016 (“Bankruptcy Code”) was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Any decision of the committee of creditors must be taken by a vote of not less than 75% of the voting share of all financial creditors. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it.

In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor’s assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured credits. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company’s ability to recover our loans from the borrowers and enforcement of our Company’s rights will be subject to the Bankruptcy Code.

10. ***Risks relating to any international regulations, FATCA, taxation rules may apply on the NRIs as the Issue may be marketed to NRIs***

The NCDs have not been recommended by any U.S. federal or state securities commission or regulatory authority. Furthermore, the foregoing authorities have not confirmed the accuracy or determined the adequacy of this Shelf Prospectus. Any representation to the contrary is a criminal offence in the United States and may be a criminal offence in other jurisdictions. The NCDs have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”) or any state securities laws in the United States and may not be offered or sold within the United States under the U.S. Securities Act, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws in the United States. Further, any person making or intending to make an offer of NCDs within the European Economic Area (“EEA”) which are the subject of the Issue contemplated in this Shelf Prospectus should only do so in circumstances in which no obligation arises for our Company to produce a prospectus for such offer.

Foreign Account Tax Compliance Act withholding may affect payments on the NCDs. Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 (“FATCA”) impose a new reporting regime and, potentially, a 30% withholding tax with respect to (i) certain payments from sources within the United States, (ii) “foreign pass thru payments” made to certain non-U.S. financial institutions that do not comply with this new reporting regime, and (iii) payments to certain investors that do not provide identification information with respect to interests issued by a

participating non-U.S. financial institution. FATCA may affect payments made to custodians or intermediaries in the payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. This is not a complete analysis or listing of all potential tax consequences of FATCA. Investors should consult their own tax advisers to obtain a more detailed explanation of FATCA and how FATCA may affect them. India and United States have signed an agreement on 9 July to share financial information about their residents, which takes effect on September 30, 2015 and the amendments to the Income Tax Act, have been notified on 7 August by the CBDT. Therefore, if any withholding or deduction is required pursuant to section 1471 through 1474 of the US Internal Revenue Code of 1986 (FATCA), any regulation or agreements thereunder, official interpretations thereof, or any law implementing an intergovernmental approach thereto, our company shall make such FATCA deduction and shall not be liable to compensate, reimburse, indemnify or otherwise make any payment whatsoever directly or indirectly in respect of such FATCA deduction.

Credit Ratings and Rationale

By its letters dated September 01, 2017 and revalidation letters dated March 01, 2019 and March 25, 2019, BRICKWORK has assigned a rating of “BWR AA+” (BWR Double A plus) to the issue of NCDs i.e. for both Secured NCD and Unsecured NCDs, to the extent of. ₹1,500 Crore for Secured NCDs and ₹500 Crore for Unsecured NCDs.

All Instruments with BWR AA+ rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk. Set out below is an extract of the rating rationale adopted by BRICKWORK dated December 17, 2018

“Brickwork Ratings (BWR) assigned BWR AA+ (Pronounced BWR Double A Plus) with a stable outlook for NCD issues aggregating to ₹2,000 cr. The rating “BWR AA+” stands for an instrument that is considered to have high degree of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk. The rating, inter alia, factors the Infrastructure Finance Company status enjoyed by SIFL as per RBI’s prescribed norms, the time tested experience of the Promoter group in line of infrastructure financing and equipment financing businesses, improvement of Net Interest Income and profit margin, improvement in assets quality as evidenced in decreasing NPA levels, adequate capitalization and sufficient cushion against commercial paper issue available in the form of unutilized working capital limits. The rating, is however, constrained by continued slow pace of infrastructure sector and high portfolio concentration in power sector, road and SEZ/Industrial Park Sector.

Act and such tax would need to be withheld at the time of credit or payment as per the provisions of Section 193 of the I.T. Act. However, no income tax is deductible at source in respect of the following:
 - a. In case the payment of interest on debentures to a resident individual or a Hindu Undivided Family ('HUF') Debenture Holder does not or is not likely to exceed Rs. 5,000 in the aggregate during the financial year and the interest is paid by an account payee cheque.
 - b. In case the payment of interest on any security issued by a company in a dematerialized form and is listed on recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 and the rules made there under.
 - c. When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
 - d.
 - (i) When the resident Debenture Holder with PAN (not being a company or a firm) submits a declaration as per the provisions of section 197(1A) of the I.T. Act in the prescribed Form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the previous year in which such income is to be included in computing his total income will be NIL. However, under section 197A (1B) of the I.T. Act, Form 15G cannot be submitted nor considered for exemption from deduction from tax at source if the aggregate of income of the nature referred to in the said section such as dividend income referred to in Section 194 of the I.T Act, interest on securities, interest on sum given on interest, income from mutual fund units, withdrawal from National Savings Scheme, etc. credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax.

To illustrate, as on 01.04.2018, the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is ₹ 2,50,000; in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial year (Senior Citizen) is ₹ 3,00,000; and in the case of every individual being a resident in India, who is of the age of 80 years or more at any time during the Financial year (Super Senior Citizen) is ₹ 5,00,000 for

Assessment Year 2019-20. Further, Section 87A of the I.T. Act provides a tax rebate of 100 percent of income-tax or an amount of ₹ 2,500 whichever is less to a resident individual whose total income, (less deductions under section 80 of the I.T Act) does not exceed ₹ 3,50,000 during the Financial year.

- (ii) Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non-deduction of tax at source in accordance with the provisions of section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.
 - (iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No.15G with PAN / Form No.15H with PAN / Certificate issued u/s 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.

Act, a listed debenture is treated as a long term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer. Under section 112 of the I.T. Act, capital gains arising on the transfer of long term capital assets being listed securities are subject to tax at the rate of 20% of capital gains calculated after reducing indexed cost of acquisition or 10% of capital gains without indexation of the cost of acquisition. The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.
- However as per the third proviso to section 48 of I.T. Act, benefit of indexation of cost of acquisition under second proviso of section 48 of I.T. Act, is not available in case of bonds and debenture, except capital indexed bonds issued by the Government and sovereign gold bond issued by the RBI. Thus, long term capital gains arising out of listed debentures would be subject to tax at the rate of 10 % computed without indexation.
- In case of an individual or HUF, being a resident, where the total income as reduced by such long term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.
- In addition to the aforesaid tax, a surcharge of 10% of such tax liability (if net income exceeds Rs. 5,000,000 and does not exceed ₹ 10,000,000) and 15% of such tax liability (if net income exceeds Rs. 10,000,000) in case of individuals, a surcharge of 12% of such tax liability in the case of firms (if net income exceeds Rs. 10,000,000) and a surcharge of 7% (if net income is in the range of Rs.10,000,000 to Rs. 100,000,000) & 12% (if net income exceeds Rs. 100,000,000) of such tax liability in case of domestic companies is also payable. A 4% Health and Education cess on the total income tax (including surcharge) is payable by all categories of taxpayers.
4. Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such short term capital gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act.
6. Interest on application money would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 194A of the Income Tax Act, 1961.
7. Securities Transaction Tax (“STT”) is a tax being levied on all transactions in specified securities done on the stock exchanges at rates prescribed by the Central Government from time to time. STT is not applicable on transactions in the Bonds.
8. As per Section 74 read with section 71 of the I.T. Act, short-term capital loss on debentures suffered during the year is allowed to be set-off against short-term as well as long-term capital gains of the said year. Balance loss, if any, could be carried forward for eight years for claiming

set-off against subsequent years' short-term as well as long term capital gains. Act in accordance with and subject to the provisions contained therein.  - c. As per section 115G of the I.T. Act, it shall not be necessary for a non-resident Indian to file a return of income under section 139(1) of the I.T. Act, if his total income consists only of investment income as defined under section 115C of the I.T Act and/or long term capital gains earned on transfer of such investment acquired out of convertible foreign exchange, and the tax has been deducted at source from such income under the provisions of Chapter XVII-B of the I.T. Act in accordance with and subject to the provisions contained therein.
 - d. As per section 115H of the I.T. Act, where a non-resident Indian becomes a resident in India in any subsequent year, he may furnish to the Assessing Officer a declaration in writing along with return of income under section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian Company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein. On doing so, the provisions of Chapter XII-A shall continue to apply to him in relation to such income for that assessment year and for every subsequent assessment year until the transfer or conversion (otherwise than by transfer) into money of such assets.
2. In accordance with and subject to the provisions of section 115I of the I.T. Act, a Non-Resident Indian may opt not to be governed by the provisions of Chapter XII-A of the I.T. Act. In that case,

Act.
7. As per Section 74 read with section 71 of the I.T. GLOBAL ECONOMY

Global growth for 2018–19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April and it has become less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded. Global growth is projected at 3.7 percent for 2018–19—0.2 percentage point lower for both years than forecast in April. The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies, the negative effects of the trade measures implemented or approved between April and mid-September, as well as a weaker outlook for some key emerging market and developing economies arising from country-specific factors, tighter financial conditions, geopolitical tensions, and higher oil import bills. Beyond the next couple of years, as output gaps close and monetary policy settings begin to normalize, growth in most advanced economies is expected to decline to potential rates well below the averages reached before the global financial crisis of a decade ago. Medium-term prospects remain generally strong in emerging Asia but subpar in some emerging market and developing economies, especially for per capita growth, including in commodity exporters that continue to face substantial fiscal consolidation needs or are mired in war and conflict.

The balance of risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty. Several of the downside risks highlighted in the April 2018 World Economic Outlook (WEO)—such as rising trade barriers and a reversal of capital flows to emerging market economies with weaker fundamentals and higher political risk—have become more pronounced or have partially materialized. Meanwhile, the potential for upside surprises has receded, given the tightening of financial conditions in some parts of the world, higher trade costs, slow implementation of reforms recommended in the past, and waning growth momentum. While financial market conditions remain accommodative in advanced economies, they could tighten rapidly if trade tensions and policy uncertainty intensify, or unexpectedly high inflation in the United States triggers a stronger-than-anticipated monetary policy response. Tighter financial conditions in advanced economies could cause disruptive portfolio adjustments, sharp exchange rate movements, and further reductions in capital inflows to emerging markets, particularly those with greater vulnerabilities.

The recovery has helped lift employment and income, has strengthened balance sheets, and has provided an opportunity to rebuild buffers. However, with risks shifting to the downside, there is greater urgency for policies to enhance prospects for strong and inclusive growth. Avoiding protectionist reactions to structural change and finding cooperative solutions that promote continued growth in goods and services trade remain essential to preserving and extending the global expansion. At a time of above-potential growth in many economies, policymakers should aim to enact reforms that raise medium-term incomes for the benefit of all. With shrinking excess capacity and mounting downside risks, many countries need to rebuild fiscal buffers and strengthen their resilience to an environment in which financial conditions could tighten suddenly and sharply.

Outlook:

The global expansion has weakened. Global growth for 2018 is estimated at 3.7 percent, as in the October 2018 World Economic Outlook (WEO) forecast, despite weaker performance in some economies, notably Europe and Asia. The global economy is projected to grow at 3.5 percent in 2019 and 3.6 percent in 2020, 0.2 and 0.1 percentage point below last October's projections.

The global growth forecast for 2019 and 2020 had already been revised downward in the last WEO, partly because of the negative effects of tariff increases enacted in the United States and China earlier that year. The further downward revision since October in part reflects carry over from softer momentum in the second half of 2018—including in Germany following the introduction of new automobile fuel emission standards and in Italy where

concerns about sovereign and financial risk have weighed on domestic demand—but also weakening financial market sentiment as well as a contraction in Turkey now projected to be deeper than anticipated.

Risks to global growth tilt to the downside. An escalation of trade tensions beyond those already incorporated in the forecast remains a key source of risk to the outlook. Financial conditions have already tightened since the fall. A range of triggers beyond escalating trade tensions could spark a further deterioration in risk sentiment with adverse growth implications, especially given the high levels of public and private debt. These potential triggers include a “no-deal” withdrawal of the United Kingdom from the European Union and a greater-than-envisaged slowdown in China.

The main shared policy priority is for countries to resolve cooperatively and quickly their traded is agreements and the resulting policy uncertainty, rather than raising harmful barriers further and destabilizing an already slowing global economy. Across all economies, measures to boost potential output growth, enhance inclusiveness, and strengthen fiscal and financial buffers in an environment of high debt burdens and tighter financial conditions are imperatives.

The growth forecast for the United States also remains unchanged. Growth is expected to decline to 2.5 percent in 2019 and soften further to 1.8 percent in 2020 with the unwinding of fiscal stimulus and as the federal funds rate temporarily overshoots the neutral rate of interest. Nevertheless, the projected pace of expansion is above the US economy’s estimated potential growth rate in both years. Strong domestic demand growth will support rising imports and contribute to a widening of the US current account deficit.

THE INDIAN ECONOMY

Overview

Following are the few major points assessed by MPC (Monetary Policy Committee) on the current economic situation of India by RBI in its meeting held on February 05, 2019,

1. Since the last MPC meeting in December 2018, there has been a slowdown in global economic activity. Among key advanced economies (AEs), economic activity in the US lost some steam in Q4:2018. The outlook for Q1:2019 is clouded by the partial government shutdown, though the labour market conditions remain strong. In the Euro area, economic activity lost momentum on weak industrial activity. The Japanese economy is gradually recovering and an accommodative monetary policy stance is expected to buttress domestic spending
2. Economic activity also slowed in some major emerging market economies (EMEs). In China, growth decelerated in Q4:2018. Economic activity in Russia lost pace, with soft oil prices posing a downside risk to growth. The Brazilian economy appeared to have ended 2018 on a firmer note, driven by improved domestic spending and exports, though industrial activity continued to struggle to recover from the disruptions of H1:2018. In South Africa, the economic recovery in Q4:2018 remained gradual, tempered by weak industrial activity and subdued exports.
3. Crude oil prices recovered from their December lows in early January on production cuts, but remain below their peak levels in October. Base metals, which witnessed selling pressures in December on persisting uncertainty over US-China trade frictions, recouped losses in January on expectations of thawing of trade disputes and production disruptions. Gold prices have risen, underpinned by safe haven demand in response to geo-political uncertainty and volatility in equity markets. Inflation edged lower in major AEs and many key EMEs
4. The first advance estimate by CSO (Central Statistical Office), have placed the growth of real gross value added (GVA) at 7.0 per cent in 2018-19 as compared with 6.9 per cent in 2017-18. The estimates incorporated a slowdown in agricultural GVA growth and an acceleration in industrial GVA growth. Services GVA growth is set to soften due to subdued activity in trade, hotels, transport, communication and other services. Growth in public administration and defence services is also likely to moderate
5. Retail inflation, measured by y-o-y change in the CPI, declined from 3.4 per cent in October 2018 to 2.2 per cent in December, the lowest print in the last eighteen months. Continuing deflation in food items, a sharp fall in fuel inflation and some edging down of inflation excluding food and fuel contributed to the decline in headline inflation
6. Inflation in the fuel and light group fell from 8.5 per cent in October to 4.5 per cent in December, pulled down by a sharp decline in the prices of liquefied petroleum gas (LPG), reflecting softening of international petroleum product prices. Kerosene inflation continued to edge up due to the calibrated increase in its administered price.

7. CPI inflation excluding food and fuel decelerated to 5.6 per cent in December from 6.2 per cent in October, dragged down mainly by the moderation in the prices of petrol and diesel in line with the decline in international petroleum product prices. Housing inflation continued to edge down as the impact of the house rent allowance (HRA) increase for central government employees dissipated. However, inflation in several of the sub-groups – household goods and services; health; recreation and amusement; and education – firmed up in December, offsetting much of the impact of lower inflation in petrol, diesel and housing
8. Export growth on a y-o-y basis was almost flat in November and December 2018, primarily due to a high base effect and weak global demand. While growth in exports of petroleum products remained positive, non-oil exports declined, dragged down by lower shipments of gems and jewellery, engineering goods, meat and poultry. Import growth slowed in November and turned negative in December 2018. While imports of petroleum (crude and 5 products) rose in line with the increase in import volumes, non-oil imports such as pearls and precious stones, gold, electronic goods and transport equipment, recorded declines. The merchandise trade deficit for April-December 2018 was a shade higher than its level a year ago. Net services exports picked up in October and November 2018, which combined with low oil prices, could have a salutary impact on the current account deficit in Q3. On the financing side, net FDI flows to India during April-November 2018 were higher than a year ago. Foreign portfolio flows turned negative in January 2019, after rebounding in November and December 2018. India's foreign exchange reserves were at US\$ 400.2 billion on February 1, 2019.

Outlook

In the fifth bi-monthly monetary policy resolution in December 2018, CPI inflation for 2018-19 was projected in the range of 2.7-3.2 per cent in H2:2018-19 and 3.8-4.2 per cent in H1:2019-20, with risks tilted to the upside. The actual inflation outcome at 2.6 per cent in Q3:2018-19 was marginally lower than the projection. There have been downward revisions in inflation projections during the course of the year, reflecting mainly the unprecedented soft inflation recorded across food sub-groups

Turning to the growth outlook, GDP growth for 2018-19 in the December policy was projected at 7.4 per cent (7.2-7.3 per cent in H2) and at 7.5 per cent for H1:2019-20, with risks somewhat to the downside. The CSO has estimated GDP growth at 7.2 per cent for 2018-19. Looking beyond the current year, the growth outlook is likely to be influenced by the following factors. First, aggregate bank credit and overall financial flows to the commercial sector continue to be strong but are yet to be broad-based. Secondly, in spite of soft crude oil prices and the lagged impact of the recent depreciation of the Indian rupee on net exports, slowing global demand could pose headwinds. In particular, trade tensions and associated uncertainties appear to be moderating global growth. Taking into consideration the above factors, GDP growth for 2019-20 is projected at 7.4 per cent – in the range of 7.2-7.4 per cent in H1, and 7.5 per cent in Q3 – with risks evenly balanced

STRUCTURE OF INDIA'S FINANCIAL SERVICES INDUSTRY

The RBI is the central regulatory and supervisory authority for the Indian financial system. The Board for Financial Supervision (“BFS”), constituted in November 1994, is the principal body responsible for the enforcement of the RBI's statutory regulatory and supervisory functions. SEBI and the Insurance Regulatory Development Authority (“IRDA”) regulate the capital markets and the insurance sector respectively.

A variety of financial institutions and intermediaries, in both the public and private sector, participate in India's financial services industry. These are:

1. Commercial banks;
2. Non-Banking Finance Companies (“NBFCs”);
3. Specialized financial institutions, such as the National Bank for Agriculture and Rural Development, the Export-Import Bank of India, the Small Industries Development Bank of India and the Tourism Finance Corporation of India;
4. Securities brokers;
5. Investment banks;
6. Insurance companies;
7. Mutual funds;
8. Alternative Investment Funds; and
9. Venture capital funds.

NON-BANKING FINANCE COMPANIES

The structure and operations of NBFCs are regulated by the RBI, within the framework of Chapter III B of the RBI Act and the directions issued by it under the RBI Act. As set out in the RBI Act, a “Non-Banking Financial Company” is defined as:

- a financial institution which is a company;
- a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner; or
- such other non-banking institution or class of such institutions, as the bank may, with the previous approval of the central Government and by notification in the Official Gazette, specify.

Under the provisions of the RBI Act, it is mandatory for a NBFC to be registered with the RBI. For such registration with the RBI, a company incorporated under the Companies Act 1956 and which wishes to commence business as a NBFC, must have a minimum Net Owned Fund (“NOF”) of ₹ 20,000,000. A NOF refers to funds (paid-up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account and capital reserves representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of asset, after deducting there from accumulated balance of loss, deferred revenue expenditure and other intangible assets) less, (i) investments in shares of subsidiaries/companies in the same group or all other NBFCs; and (ii) the book value of debentures/bonds/outstanding loans and advances, including hire-purchase and lease finance made to, and deposits with, subsidiaries/companies in the same group, in excess of 10% of the owned funds.

The registration process involves the submission of an Application by the company in prescribed format along with the necessary documents for the RBI's consideration. If the RBI is satisfied that the conditions set out in the RBI Act are fulfilled, it issues a “Certificate of Registration” to the company. There are two broad categories of NBFCs based on whether they accept public deposits, namely deposit-taking NBFCs (NBFCs-D) and non-deposit-taking NBFCs (NBFCs-ND). Only those NBFCs holding a valid Certificate of Registration with authorization to accept public deposits can accept and hold public deposits. In addition to having the minimum stipulated NOF, NBFCs should also comply with separate prudential norms prescribed for NBFCs-D and NBFCs-ND. The detailed regulations applicable to NBFCs are available at the RBI website of RBI (www.nbfc.rbi.org.in).

NBFCs are required to adhere to the Prudential Norms Directions which, amongst other requirements, prescribe guidelines regarding income recognition, asset classification, provisioning requirements, constitution of audit committee, capital adequacy requirements, concentration of credit/investment and norms relating to infrastructure loans.

NBFCs are also required to put in place appropriate internal principles and procedures in determining interest rates and processing and other charges in terms of the RBI circular dated May 24, 2007. In addition to the aforesaid, NBFCs are required to adopt an interest rate model for regulating the rates of interest charged by the them in

accordance with the Master Circular on Fair Practices Code dated July 1, 2010 issued by the RBI to all NBFCs. See the section titled “*Regulations and Policies*” on page no 207 of this Shelf Prospectus.

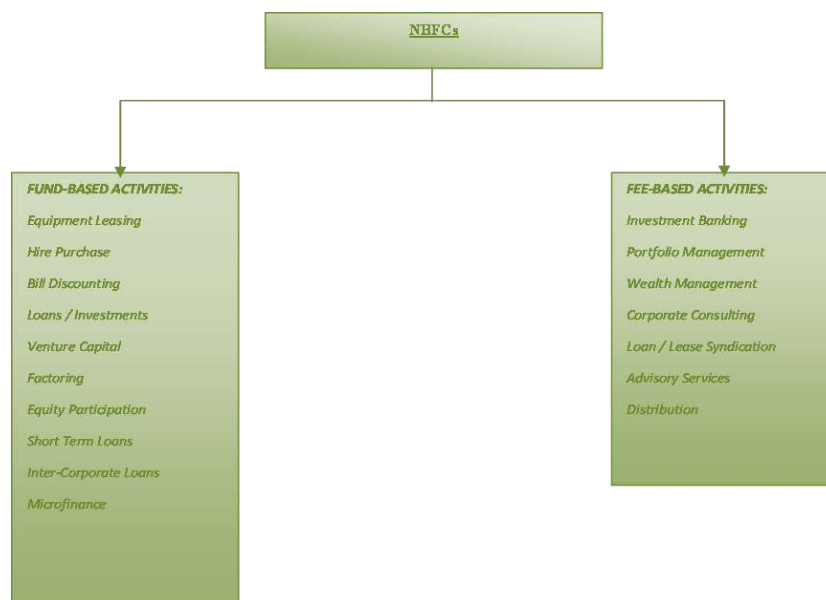

NBFCs are categorized a) in terms of the type of liabilities into Deposit and Non-Deposit accepting NBFCs, b) Non-Deposit taking NBFCs by their size into systemically important and other non-deposit holding companies (NBFC-NDSI and NBFC-ND) and c) by the kind of activity they conduct. THE INFRASTRUCTURE FINANCE INDUSTRY IN INDIA

Providers of Infrastructure Finance

The primary providers of infrastructure finance in India are financial institutions, public sector banks & other public sector institutions, private banks, foreign banks and multilateral development institutions.

Financial institutions

Financial institutions provide medium and long-term financial assistance across various industries to establish new projects and for the expansion and modernization of existing facilities. These institutions provide both fund-based and non-fund based assistance in the form of loans, underwriting, direct subscription to shares, debentures and guarantees. The primary long-term lending institutions include India Infrastructure Finance Company Limited (IIFCL), IFCI Limited, Industrial Development Bank of India Limited and Small Industries Development Bank of India.

Specialized financial institutions

In addition, there are various specialized financial institutions which cater to the specific needs of various sectors. These include the National Bank for Agricultural and Rural Development, Export-Import Bank of India, IFCI Venture Capital Funds Limited (formerly the Risk Capital and Technology Finance Corporation Limited), Tourism Finance Corporation of India Limited, Housing and Urban Development Corporation Limited, Power Finance Corporation Limited, Infrastructure Leasing & Financial Services Limited, Rural Electrification Corporation Limited and Indian Railway Finance Corporation Limited.

State level financial institutions

State financial corporations, such as Maharashtra State Financial Corporation, Delhi Financial Corporation and Madhya Pradesh Financial Corporation, were set up to finance and promote small and medium-term enterprises at a

state level and they form an integral part of the institutional financing system. There are also state industrial development corporations operating at state level, which provide finance primarily to medium- to large-sized enterprises. These include Maharashtra Industrial Development Corporation, Gujarat Industrial Development Corporation and Madhya Pradesh Industrial Development Corporation

Public sector banks and other public-sector institutions

Public sector banks make up the largest category of banks in the Indian banking system. The primary public-sector banks operating in the infrastructure finance sector include IDBI Bank, State Bank of India, Punjab National Bank, Canara Bank and the Bank of Baroda. Other public-sector entities, for example, the Life Insurance Corporation of India, also provide financing to the infrastructure sector.

Private sector banks

After completion of the first phase of the bank nationalization in 1969, the majority of Indian banks were public sector banks. Some existing private sector banks, which showed signs of an eventual default, were merged with state-owned banks. In July 1993, as part of the banking reform process and to induce competition in the banking sector, the RBI permitted entry by the private sector into the banking system resulting in the introduction of nine private sector banks which are collectively known as the “new” private sector banks. The primary private sector bank operating in the infrastructure financing sector is ICICI Bank.

Infrastructure Finance Companies (“IFCs”)

In February 2010, the RBI introduced IFCs as a new category of infrastructure funding entities. Non-deposit taking NBFCs which satisfy the following conditions are eligible to apply to the RBI to seek IFC status:

- A minimum of 75% of its assets deployed in infrastructure loans;
- Minimum net-worth of ₹ 3,000 million;
- Minimum credit rating “A” or equivalent Credit Rating and Information Services of India Limited, India Ratings and Research Private Limited, Credit Analysis and Research Limited, ICRA Limited or equivalent rating by any other accrediting agencies; and
- Capital to Risk (weighted) Assets Ratio of 15% (with a minimum Tier 1 capital of 10%).

IFCs enjoy benefits which include a lower risk weight on their bank borrowings (from a flat 100% to as low as 20% for AAA-rated borrowers), higher permissible bank borrowing (up to 20% of the bank’s net worth compared to 15% for an NBFC that is not an IFC), access to external commercial borrowings (up to 75% of owned funds under the automatic route) and relaxation in their single party and group exposure norms. These benefits should enable a highly rated IFC to raise more funds, of longer tenors and at lower costs, and in turn to lend more to infrastructure companies.

Overview:

Infrastructure sector plays an important role in the growth and development of Indian economy. Nearly, 9% of India’s GDP is spent on Infrastructure services. It comprises of construction of power, bridges, dams, roads and urban infrastructure development which also forms as base and supporting factor for other services sectors. As infrastructure is highly responsible for propelling growth of other sectors and India’s overall development, Government of India is giving huge impetus for development of Infrastructure and construction services through focused policies such as open FDI norms, large budget allocation to Infrastructure sector, Smart cities mission, etc. India has become a large market for Infrastructure and Construction activities with the contribution of US \$ 738.5 Billion in the FY2017 and is expected to become 3rd largest market in the world by 2025 (KPMG Infrastructure Report).

Infrastructure and construction sector has the 2nd largest share in in FDI inflows. Cumulative FDI inflows in the Construction Activities sector, which includes infrastructure, reached US\$ 13.11 billion between April 2000 to June 2018 and in the Construction Development sector reached US\$ 24.87 billion. Construction services exports has also increased from US \$ 1004 million in 2012 to 2256 million in 2018. Infrastructure related activities witnessed strong growth during 2017- 18.

- National highway construction recorded the highest increase of 20 %.
- Freight traffic handled by Indian Railways increased 5.89 % Year-on-year during April-July 2018(P) to 396.86 million tonnes.
- Cargo handled by major Indian ports increased by 5.13 % during April-August 2018.
- Electricity generation in the country increased by 3.84% during April-July 2018.

Growth Drivers for the sector:

Rising Investments: In recent years, India has emerged as one of the most attractive destinations for doing business and making investments. India ranks among the top 10 FDI destinations globally. FDI inflows in the construction

activities sector, which includes infrastructure, reached US\$ 13.11 billion between April 2000 to June 2018. 100% FDI allowed in infrastructure development projects such as township, housing and built-up infrastructure and constructive developments.

Infrastructure needs: India is the fastest growing major economy in the world in 2018 and 2019. 6th largest economy in the world by nominal GDP and 3rd largest economy globally by PPP. With large share in world FDI inflows and Trade, demand of strong Infrastructure is essential. Investment worth Rs 50 trillion (US\$ 777.73 billion) is required in infrastructure by 2022 to have sustainable development in the country. Sectors like Ports Development, power transmission, roads & highways and renewable energy will drive the investments in the years to come.

Public Private Partnerships (PPP): PPP in infrastructure space have increased and are expected to grow even further. Private equity and venture capital (PE/VC) investments in the infrastructure and real estate reached US\$ 3.9 billion with 29 deals during the first half of 2018. Indian infrastructure sector witnessed 91 M&A deals worth US\$ 5.4 billion in 2017. Investment worth Rs 50 trillion (US\$ 777.73 billion) in infrastructure is required by 2022 for country's sustainable development.

Government Initiatives: The Government of India is expected to invest highly in the infrastructure sector, mainly highways, renewable energy and urban transport. High Budget allocations, Smart City Mission, Pradhan Mantri Awas Yojana, new metro rail policy, Housing for all, North East Special Infrastructure Development Scheme (NESIDS), etc. are some important initiatives taken by government which is driving the growth of India's Infrastructure sector.

Improvement in Logistics: Indian logistics sector is growing 10% annually and is expected to reach US\$ 215 billion in 2019-20. Rising Logistics services, increased demand of supporting Infrastructure such as Shipping Ports, Railways and Roadways connectivity. In 2016, India jumped 19 places in World Bank's Logistics Performance Index (LPI) 2016, to rank 35th amongst 160 countries.

- NHAI is making all out efforts to achieve its target of awarding 10,000 km during 2017-18. During the last 5 years NHAI's average award has been 2,860 Km, with 4,335 Km awarded in FY 2016-17

Key announcements

- Ministry of road has been allocated Rs. 59,425 crore for the year 2018-19
- NHAI will consider organizing its road assets into Special Purpose Vehicles and use innovative monetizing structures like Toll, Operate and Transfer (TOT) and Infrastructure Investment Funds (InvITs)
- The system of toll payments physically by cash at road toll plazas is being fast replaced with Fastags and other electronic payment systems to make road travel seamless

Pradhan Mantri Gram Sadak Yojana to focus on constructing 57,000 km of rural roads with gross budget support of Rs. 19,000 crore allocated to this scheme

Impact on the industry

- Monetization of existing revenue generating projects would lead to newer projects being awarded and increase in order books for road construction companies
- Higher rate of road construction also augurs well for supporting sectors like construction material and automobile sector
- Faster implementation of road projects would also lead to better connectivity between ports, industrial clusters, cities etc

Power Sector:

- The Indian renewable energy industry has witnessed a transition from being a sunrise industry to a highly competitive industry during the last 12-18 months. Considerable investment from Central Government and its push to meet a 175GW installed capacity target for Renewable energy has ensured that the industry has a steady pipeline of orders for operators and renewable energy power utilities. The tariffs of solar and wind energy have been consistently pegged at sub-Rs. 3 levels during 2017, which makes it competitive to conventional power sources
- The installed capacity of renewable energy sector stood at 63 GW constituting 19% as on December 2017 of total installed capacity, up from 15% as on December 2016. Out of this solar and wind energy constituted 27% and 52% respectively and the remaining are biomass and small hydro projects
- The overall capacity stood at 333GW at the end of 2017. The conventional energy sector especially thermal power (coal and gas) has witnessed improved capacity utilisation during the April-December 2017 period
- The government targeting 100% rural electrification and connecting every rural home to a source of electricity is expected to drive demand which in turn would improve the capacity utilization of conventional power plants. Another factor which has affected the sector was fuel supply (both coal and gas) and investment by Government to set up more LNG terminals at major ports and investment in railway

connectivity with coal pitheads and rake increase for steady supply of coal to power plants are general expectations

- The sector witnessed some consolidation due to standalone power producers facing losses on the back of higher imported coal prices and inability to recover the same through increased tariffs
- UDAY Scheme aimed at reviving ailing State Discoms is showing improvement across states. 86.3% of Rs. 2.7 lakh crore worth of bonds have already been issued for 16 states and tariff revisions have been conducted across 25 out of the 27 states who are a part of the scheme. The scheme has marginally improved the financials of the discoms which in turn has led to improvement in payment and newer PPAs being signed

Key schemes announced

- Elimination of customs duty rate on solar tempered glass
- “Saubhagya Scheme” which focuses on rural electrification connecting 8 crore homes with electricity is the single largest announcement which was made during the budget. The total allocation for the scheme is Rs. 16,000 crore

Impact on industry

- Abolition of custom duty on solar tempered glass would be marginally positive for domestic solar cell / panel / modules manufacturers as their cost of production would marginally decline which would marginally improve their cost competitiveness compared to imported solar cells / panels / modules
- The scheme is expected to benefit companies in transmission and distribution, power equipment. Power utilities would benefit from increased demand for electricity generated

Oil and Gas:

- The Oil and gas industry globally is divided into three major sectors viz. (1) Upstream (involves exploring and production of crude oil) (2) Midstream (stores oil, gas and refined products as well as transports them to refineries) and (3) Downstream (includes all refineries and petrochemical plants which converts the crude oil into various petroleum products)
- FY 2017-18 has been volatile for the oil and gas sector. Prices of Brent have been rising due to production cuts posed by OPEC and Non OPEC countries causing supply disruptions and also due lower than expected US inventories. The increase in demand of oil due to the recovery of European economies is also adding pressure on the prices of oil in the upward direction. Brent was \$32.1/bbl in January 2016 and \$64.1/bbl in December 2017.
- The government aims to reduce oil and gas imports by 10% by 2022
- For the FY 2017-18 price of crude oil for the budget was estimated at \$55/bbl. Petroleum subsidy for 2017-18 was Rs. 25,000 crore of which Rs. 16,076.13 crore was been earmarked for LPG subsidy and the rest was for kerosene. The government had raised the price of Kerosene by 25p every fortnight till its subsidy was over, as demand for kerosene was falling as many households in rural India had switched to LPG and also due to the misuse of kerosene in the adulteration of diesel.
- The government also raised the price of LPG so the subsidy could only restrict to the families below the poverty line. Under the Pradhan Mantri Ujjwala Yojana which was launched in May 2016, 5 crore women were to be provided LPG connections. Uptill now more than 2.5 crore connections have been installed under the scheme

Key Budget Proposal

- To provide 8 crore rural woman free LPG connections under the Pradhan Mantri Ujjwala Yojana
- The Oil and Gas industry has received as Rs. 24,932.80 crore as subsidies where Rs. 20,377.80 crore is earmarked as the LPG subsidy and the remaining Rs. 4,555.00 crore is to be given as the kerosene subsidy

Impact on the industry

- Increase in consumption of LPG, to benefit Oil Marketing Companies (OMCs)
- The subsidy will provide an increase in the consumption and production of LPG which in turn will be likely to benefit OMCs. The government has also reduced the allocation towards Kerosene as it is discouraging the use of kerosene

OUR FUNDING STRUCTURE

Our Company is an NBFC-ND-SI. Accordingly, our Company does not accept deposits, and as such, we rely on equity (in the form of shareholders’ funds) and loan funds (in the form of various secured and unsecured borrowings) in order to meet our capital and funding requirements. Of these funding sources, secured loans remain the most significant source of funding across all three of our core finance business groups. Our Secured borrowings as a percentage of the total sources of funds of our Company as at March 31, 2018, March 31, 2017, March 31, 2016, 2015 and 2014 stood at 69.33%, 70.56%, 73.46%, 75.05% and 74.44%, respectively. As at December 31, 2018 our secured loans as percentage of the total source of funds of our Company is 69.60%.

As a general principle, we prefer to borrow long-term funds from a diversified lender base and we accordingly aim to develop our balance sheet by matching such funds with the maturities of our assets and interest rate structure. We believe that a diversified lender profile ensures that we are not overly dependent on any one source or a few financial institutions. In light of this, and our growing funding requirements, we have made conscious efforts to diversify our lender base to include a larger number of different types of banks (public sector banks, domestic private banks and foreign banks), financial institutions (principally in the form of debt) and retail investors (principally in the form of debt through public issue of debt).

6. Treasury function

Treasury team takes care of fund mobilization in addition to disbursement of loan and arranging Letter of Credit (“LC”)/Bank Guarantee (“BG”). They indicate cost of and availability of funds to the business. They also monitor and report the prudential exposure limits.

7. Credit Pricing

Pricing is essentially a function of risk, tenure and market forces. As far as fund-based exposure is concerned it has two components, viz., benchmark and spread. The benchmark and spread are a function of cost of funds, overheads and credit losses. The decision of the interest rate being either fixed or floating will be dependent on the nature of the product being offered, market conditions, cost and source of funds.

Interest rates on loans and advances are generally linked to the SREI Benchmark Rate (“SBR”). The SBR is determined by the interest rate risk (function of tenure and interest rate outlook), market risk, cost of operations and minimum returns required on capital. Our Company constantly monitors and if required, resets the SBR, taking into account the various factors mentioned above. The asset liability management committee (“ALM”) of our Company has the authority to set and reset the SBR.

Our Company may also set a term premium which would vary from time to time depending on the changes in the market rates.

It is necessary that the spread is determined by credit risk rating, structure of the transaction, instrument design, etc. Our Company therefore ensures that the pricing, in general, is in a broad indicative band, based on the credit rating and tenure.

8. Security

Our loans are mostly secured loans. It is usually backed by a) Movable & Immovable plant & machinery, b) Land & buildings, c) Pledge of Shares (both listed and unlisted), d) Project asset, e) Personal Guarantee & Corporate Guarantee.

9. Valuation of land & building

Site visit and valuation of land & building by our internal team is mandatory for each transaction before disbursement if applicable.

10. Credit Authority – Credit Committee (CC)

Credit Committee (CC), the credit authority has the power to approve new credit limits as well as increase or extend the existing credit limits. The authority for approval of credit proposals, within limits stipulated is delegated by the Board of Directors to the Credit Committee (CC). The Committee thus exercises their powers within the framework of the norms prescribed by the Board of Directors from time to time.

Post sanction/Pre-disbursement

After sanction and before disbursement of any loan, Credit Administration shall ensure compliance to KYC and AML policy of SREI. They also ensure compliance of sanction terms and conditions and completion of legal documentation. Credit admin is also the owner of all documents. In addition, Internal Audit team also carries out pre-disbursement audit.

Post disbursement, our Company also carries out site visit and asset review on regular basis to keep track on the asset in addition the review of exposure.

Disbursement and Portfolio Management

Finally, Treasury disburses the amount to the borrower and thereafter business team will monitor the portfolio.

The authority for approval of credit proposals (including investments), within limits stipulated, is delegated by the Board of Directors to committees such as the CC. The authorities would exercise their powers within the framework of the norms prescribed by the Board of Directors from time to time. Before a credit facility (both secured as well unsecured) is provided, various approvals are required to be obtained at different stages of the credit sanctioning and disbursement process, keeping in view the specific requirements of the transactions. The approval process is done by adhering to separate stages which are pre-sanction and post-sanction. It is only after obtaining the approval of CC, the sanction letter is prepared for verification by the legal department before disbursement. Repayment Schedule

The repayment of loans and facilities is normally fixed on a case-by-case basis, depending on the nature of the project, its projected cash flows and the maturity profile of our Company's own funding mix. A pre-payment premium may be charged in case of early repayment of the facility.

Security

The project assets typically form the security for the credit facilities we provide. The details of the security to be charged in favour of our Company are stipulated by the CC and suitably reflected in the security documents in the credit approval process. The security package for each facility is structured in such a manner so as to adequately cover the risks associated with the facility.

Appropriate processes to create enforceable security in the form of a mortgage and / or hypothecation are rigorously followed. The margin requirements for different types of security are decided by the CC from time to time, and exceptions, if any, will be handled in accordance with the policies of our Company. The main security agreements are the hypothecation deed and / or the indenture of mortgage.

Documentation

Legal documents increase the clarity and predictability of our Company's rights in the event of litigation or bankruptcy. Key credit mitigants are often incorporated in the legal documents, such as loan agreements, collateral agreements, etc. Documentation standards vary by product. Terms and conditions are influenced by market convention as well as creditworthiness of the counterpart. The legal department along with business team is responsible for the negotiation, preparation and execution of loan agreements, collateral agreements and other agreements/documents (if any). Business group is involved in the process of establishing and communicating credit terms to the legal department. In addition, the legal department performs an analysis regarding the legal enforceability of netting rights under the document. This analysis takes into consideration the legal structure of the counterpart, jurisdictional issues of the counterpart country and governing laws of the agreement. Legal department endorses the level of risk mitigation provided by the terms in the document and the level of legal certainty. The process attempts to ensure that:

- The borrower's / guarantor's obligation to the Company is clearly established by the documents
- The charge created on the borrower's / third party's assets as security for the debt is maintained and enforceable
- The Company's right to enforce recovery of the debt through court of law is not allowed to become time-barred under the Law of Limitation

In addition, we also ensure that comprehensive insurance of the secured assets is in place, and that such insurance policies are kept updated and valid. The insurance policies are typically issued to our infrastructure customers, and assigned in favour of our Company and any co-financiers sharing the security on a pari passu basis, where applicable, as the loss-payees.

RISK MANAGEMENT

Our Company being in the financing industry has always been cautious and focused to keep its risks well under manageable levels. While doing business, our Company is exposed to various risks and endeavours to identify and manage them effectively by adopting best industry and regulatory practices, as inability to manage them may have serious repercussions. Our Company promotes a high degree of awareness in identifying its business risks and adopting internal control measures to reduce them to an acceptable level.

A robust risk management framework is in place to manage and mitigate risks present at all levels and across all aspects of its functioning, including business, strategic, operational, market, credit, liquidity, reputation and processes, among others. Gaining knowledge and experience of the various micro and macro operating fundamentals and situations under which the Company operates is the first step of risk management. With this knowledge, the Company identifies various factors that are affecting its operations or may be a potential threat in the future. Risk quantification, integration and assessment are the next steps of risk management at Srei Infra. Based on these, strategic decisions are taken and implemented to mitigate risks and maintain the required risk-return profile.

Post decision making, the management continuously monitors these risks to determine the effectiveness of the risk management framework. An overview of some of the major risks to the Company has been evaluated below.

Credit Risk

Risk explanation

This is the financial risk that results in a loss to the Company owing to non-payment of financial obligation by its borrowers in accordance with agreed terms. The Company's direct lending, leasing business and derivatives transactions are subject to these risks.

Risk mitigation

Equipment financing – The Company undertakes a stringent credit appraisal system for financing, as its customers belong to micro, small and medium enterprise (MSME) category. Its multi-check credit appraisal system analyses the transaction in detail along with tracking the entrepreneur's credit worthiness. Also, the Company maintains a close relationship with the borrower, which helps in closely tracking their business operations and providing timely assistance to address the business uncertainties.

Project finance – Srei Infra provides finance to various infrastructure projects as both sole lender and consortium lender. Each project / transaction is analysed in great detail by a team of highly qualified and experienced professional to understand the various risk attached with it. After understanding the risk profile, suitable mitigants are identified and then lending decision is taken on the basis of risk return analysis and our risk appetite.

The Company has a documented Credit Risk Management Policy which is formally reviewed and updated at least annually by the Risk Committee of the Board (RC).

Liquidity & Funding Risk

Risk explanation

The Company's ability to meet its financial obligations in a timely manner and have adequate funding options, whenever required, are critical for maintaining a constant business cycle.

Risk mitigation

Srei Infra regularly maps its assets and liabilities position, cash-flow situation and market conditions, which help it determine the average liquidity position that the Company needs to maintain at any given point. It also aligns the various payment dates with receipts to achieve the maximum possible liquidity. Strong credit worthiness and relationship with a large number of domestic and international banks ensure adequate funding arrangement for the

Company. The Company's excellent track record and sound lending practices make it a preferred borrower. Post-merger with Quippo, additional equity base has resulted in improved capital adequacy and increased borrowing ability.

Market Risk

Risk explanation

Financing business is strongly driven by market factors such as interest rates, foreign exchange rates, market prices, equity prices and credit spreads which are highly fluctuating in nature. Inability to control these factors can lead to reduced profitability for the Company.

Risk mitigation

Majority of Company's assets and liabilities are floating in nature. Any mismatch in the form of a basis risk between the benchmark used on the liabilities against the ones on the assets is continuously monitored by Asset Liability Management (ALM) Committee and strategies are made to manage them. For foreign currency exposure, proper hedging strategies are in place and if required, open position is kept on the basis of our view on interest rate movement. A cap for the open position is also defined and it is regularly monitored, so that appropriate action for hedging can be taken, if required.

Residual Value Risk

Risk explanation

If the amount realized on disposing of leased assets or re-letting them at the end of the leased term is less than the amount projected at the lease inception, then it may lead to losses to the firm.

Risk mitigation

An experienced and knowledgeable team, along with a robust operating process, ensures that lease period is less than economic life of the leased equipment in lease transactions. The team regularly scrutinizes the residual value exposure by evaluating the recoverability of the residual value of the leased equipment at the lease inception. This provides opportunity of re-letting the leased assets and also evaluating their projected disposal value at the end of the period. The Company makes impairment provisions if and when required. The Company also has options to use the leased assets in-house, should there be erosion in its market value.

Legal and Compliance Risk

Risk explanation

The inability of the Company to meet rules and regulations of the jurisdiction in which Srei Infra operates, involvement in illegal contractual agreements resulting in disputes, illegal infringement of assets or any other legal matter may lead to losses.

Risk mitigation

The Company has competent teams, who are conversant with the local regulatory environment. These teams keep themselves updated of all relevant regulations, makes sure that the Company adheres to them and in case of any change in the regulatory environment, appropriate steps are taken in the Company. Srei Infra's qualified and experienced legal team is involved in each transaction from the documentation to the final closure. The team makes sure that all documents are properly reviewed. The legal team works closely with the business teams to ensure that the transactions are based on unambiguous legal opinions; it provides legal support in cases of customer default, facilitating faster resolution.

Reputation Risk

Risk explanation

Any misconduct by Srei Infra's stakeholders or negligence by the Company to follow environmental norms, undertake social responsibility and follow proper governance may hamper goodwill and reputation.

Risk mitigation

Srei Infra has a stringent policy to mitigate the risk arising from this issue. Regular reviews are conducted to improve its policies and procedures to safeguard itself against reputation and operational risks. Srei has a clean credit history with not a single instance of the Company failing to meet any of its financial obligations.

Sustainability Risk

Risk explanation

Srei Infra's financing activities make it highly susceptible to this risk. Inability of the Company to identify a business model whereby the economic benefits are always higher than the environmental and social benefits may lead to huge losses and even termination of the business in the long run.

Risk mitigation

Srei Infra's risk management framework assesses the environmental and social impact of projects financed by it. Srei Infra's environmental and social management system screens all medium and large projects for categorization based on the sensitivity of the environmental issues involved. Small projects, which mainly involve individual financing, are assessed informally by verbal questioning for environmental impact. Srei Infra's environment policy is based on the guidelines and norms of best international practices, also referred to as IFC standards and incorporates requirements under Indian environmental rules and regulations. The request for nomination should be recorded by the Company within a period of two months from the date of receipt of the duly filled and signed nomination form. In the event of death of the NCD Holder or where the NCDs are held by more than one person jointly, in the event of death of all the joint holders, the person nominated as the nominee may upon the production of such evidence as may be required by the Board, elect, either:

Notwithstanding anything contained in any other law for the time being in force or in any disposition, whether testamentary or otherwise, in respect of the NCDs, where a nomination made in the prescribed manner purports to confer on any person the right to vest the NCDs, the nominee shall, on the death of the holder of NCDs or, as the case may be, on the death of the joint holders, become entitled to all the rights in the NCDs, of the NCD Holder or, as the case may be, of all the joint holders, in relation to the said NCDs, to the exclusion of all other persons, unless the nomination is varied or cancelled in the prescribed manner.

A person, being a nominee, becoming entitled to NCDs by reason of the death of the NCD Holder shall be entitled to the same interests and other advantages to which he would have been entitled to if he were the registered NCD Holder except that he shall not, before being registered as a NCD Holder in respect of such NCDs, be entitled in respect of these NCDs to exercise any right conferred by subscription to the same in relation to meetings of the NCD Holders convened by the Company. Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the NCDs, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of interests, bonuses or other moneys payable in respect of the said NCDs, until the requirements of the notice have been complied with.

A nomination may be cancelled or varied by nominating any other person in place of the present nominee, by the NCD Holder who has made the nomination, by giving a notice of such cancellation or variation in the prescribed manner as per applicable laws. The cancellation or variation shall take effect from the date on which the notice of such variation or cancellation is received.

Since the allotment of NCDs will be made only in dematerialized mode, there is no need to make a separate nomination with our Company. Laws in relation to non-banking financial companies

The Reserve Bank of India Act, 1934 (the “RBI Act”)

The RBI is entrusted with the responsibility of regulating and supervising activities of NBFCs under the RBI Act. The RBI Act defines an NBFC as:

- i. a financial institution which is a company;
- ii. a non-banking institution which is a company, and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner; or
- iii. such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the official gazette, specify.

As per the RBI Act, a financial institution is a non-banking institution, carrying on as whole or part of its business, *inter alia*, the financing of activities other than its own, by making loans, advances or otherwise; the acquisition of shares, stock, bonds, debentures, securities issued by the Government or other local authorities or other marketable securities of like nature; or letting or delivering goods to a hirer under a hire-purchase agreement.

The RBI has clarified, through a press release dated April 8, 1999, that in order to identify a particular company as an NBFC, it shall consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. A company shall be treated as an NBFC if its financial assets are more than 50% of its total assets (netted off by intangible assets), and income from financial assets is more than 50% of its gross income. Both these tests are required to be satisfied as the determinant factors for principal business of a company.

NBFCs are not permitted to commence or carry on the business of a non-banking financial institution without obtaining a certificate of registration (“CoR”) from the RBI. Further, every NBFC is required to submit to the RBI a certificate from its statutory auditor within one month from the date of finalization of its balance sheet, and in any case not later than December 31st of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a CoR.

The RBI Act makes it mandatory for every NBFC to get itself registered with the RBI in order to be able to commence any of its activities. An NBFC may be registered as a deposit-accepting NBFC (“NBFC-D”) or as a non-deposit accepting NBFC (“NBFC-ND”). Our Company has been classified as a systemically important NBFC-ND (“NBFC-ND-SI”).

Regulatory Requirements of an NBFC under the RBI Act

Net Owned Fund

The RBI Act, read with a RBI notification dated April 20, 1999, provides that to carry on the business of an NBFC, an entity would have to be registered as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹20 million. For this purpose, the RBI Act has defined ‘net owned fund’ to mean

- i. the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting
 - a. accumulated balance of losses,

- b. deferred revenue expenditure; and
- c. other intangible assets;
- ii. further reduced by the amounts representing
 - a. investment by such companies in shares of: (a) its subsidiaries, (b) companies in the same group, and (c) other NBFCs; and
 - b. the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (a) subsidiaries of such company; and (b) companies in the same group, to the extent such amount exceeds 10% of (i) above.

Reserve Fund

In addition to the above, the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less than 20% of its net profits earned annually, as disclosed in the profit and loss account, before declaration of dividend. Such sum cannot be appropriated by the NBFC except for the purposes specified by the RBI from time to time and every such appropriation is required to be reported to the RBI within 21 days from the date of such withdrawal.

Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016 dated September 1, 2016 as amended from time to time (“NBFC-SI Directions”)

Our Company has been classified as a NBFC-ND-SI. The NBFC- SI Directions define NBFC-ND-SI as a non-banking financial company not accepting or holding public deposits and having total assets of ₹5000 million and above as shown in the last audited balance sheet. For an NBFC-ND-SI to carry on its business, it must have a net owned fund of ₹20 million, failing which, they shall not be eligible to hold a CoR as an NBFC. An NBFC-ND-SI is required to maintain a minimum capital ratio consisting of Tier I and Tier II capital (as defined below) which shall not be less than 15% of its aggregate risk weighted assets on-balance sheet and of risk adjusted value of off-balance sheet items.

For the above, ‘Tier I capital’ refers to owned funds, as reduced by investment in shares of other NBFCs, and in shares, debentures, bonds, outstanding loans, advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, 10% of the owned fund; and perpetual debt instruments issued by non-deposit taking NBFC in each year to the extent it does not exceed 15% of the aggregate Tier I capital of such company as on March 31 of the previous accounting year. ‘Tier II capital’ includes, to the extent their aggregate does not exceed Tier I capital: (a) preference shares not compulsorily convertible into equity, (b) revaluation reserves at a discounted rate of 55%, (c) general provisions and loss reserves, to the extent these are not attributable to an actual diminution in value or identifiable potential loss in any specific asset, and are available to meet unexpected losses, to the extent of 1.25% of risk weighted assets, (d) hybrid debt capital instruments, (e) subordinated debt, and (f) perpetual debt instruments issued by a non deposit taking non banking financial company which is in excess of what qualifies for Tier I Capital.

The NBFC-SI Directions place several requirements that an NBFC-ND-SI must adhere to, *inter alia* regarding income recognition, income from investments, assets classification, the need to follow relevant accounting standards, the framing and implementation of an investment policy amongst others. As per the NBFC-SI Directions, the board of directors granting / intending to grant demand / call loans shall frame a policy for the company which includes, inter alia, a cut-off date within which the repayment of demand or call loan shall be demanded or called up and the rate of interest which shall be payable on such loans.

Non-Performing Assets

Under the NBFC-SI Directions, the following shall be considered as ‘non-performing assets’ (“NPAs”), if the accompanying conditions remain in existence for a period of three months or more for Fiscal 2018:

- i. Assets, in respect of which interest has remained overdue;
- ii. Term loans, inclusive of unpaid interest, when the instalment is overdue, or on which interest amounts remain overdue;
- iii. Demand or call loans, which has remained overdue, or on which interest amount remained overdue;
- iv. Bills, which have remained overdue;
- v. Interest in respect of a debt or income on receivables under the head ‘other current assets,’ being in the nature of short-term loans/advances, which have remained overdue; or
- vi. any dues on account of the sale of assets or services rendered, or reimbursement of expenses incurred, which have remained overdue.

Lease rental and hire purchase instalments shall be considered as NPAs if they remain overdue for three months or more in Fiscal 2018.

In addition, where any of the above are classified as NPAs in relation to a borrower, the balance amount outstanding under other all credit facilities extended to them are also classified as NPAs.

In terms of the NBFC-SI Directions, any income – including interest, discount, hire charges, lease rentals or other charges – on an NPA shall be recognised as ‘income’ only when it is actually realised.

Asset Classification

The NBFC-SI Directions require that every NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- i. Standard assets, i.e. assets, in respect of which, no default in repayment of principal or interest is perceived, which do not disclose any problems and do not carry more than a normal risk attached to business;
- ii. Sub-standard assets, i.e. assets which have been classified as NPAs for a period not exceeding 12 months, or where the terms regarding repayment of the payment or interest have been renegotiated, rescheduled or restructured, until satisfactory performance of the revised terms for a year;
- iii. Doubtful assets, i.e. term loans, lease assets, hire-purchase assets or any other asset that has remained sub-standard for a period of more than 12 months; and
- iv. Loss assets, i.e. assets that have been identified as such by the NBFC, its internal or external auditors, or the RBI during its inspection of the NBFC, to the extent that it has not been written off by the NBFC, or assets adversely affected by the threat of non-recoverability due to the erosion in the value of the security, non-availability of security or a fraudulent act or omission by the borrower.

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation.

Provisioning Requirements

An NBFC-ND-SI, after taking into account the time lag between an account becoming an NPA, its recognition, the realisation of the security and erosion overtime in the value of the security charged, shall make provisions against sub-standard assets, doubtful assets and loss assets in the manner provided for in the NBFC-SI Directions. Under the NBFC-SI Directions:

- i. Loss Assets: The entire assets shall be written off, and if they are permitted to remain in the books of the NBFC, 100% of the outstanding loss assets shall be provided for.
- ii. Doubtful Assets: NBFCs are required to make a 100% provision to the extent to which the advance is not covered by the realisable value of the security to which the applicable NBFC has a valid recourse. Additionally, a provision of 20% - 50% of the secured portion shall be made, in accordance with the basis prescribed in the NBFC-SI Directions.
- iii. Sub-standard assets: A general provision of 10% of the total outstanding assets shall be made.
- iv. Lease Finance and Hire Purchase Assets: NBFCs are required to provide for the total dues, as reduced by (a) the finance charges not credited to the profit and loss account and carried forward as unmatured finance charges; and (b) the depreciated value of the underlying asset.
- v. Standard Assets: NBFCs were required to make provisions of 0.40% by the end of March 2018.

The NBFC-SI Directions clarify that income recognition on NPAs and provisioning against NPAs are different aspects of the prudential norms specified therein. The provisioning requirements that such prudential norms specify shall be made on total outstanding balances, without regard to the fact that income on an NPA has not been recognised.

Disclosure Requirements

An NBFC-ND-SI is required to separately disclose in its balance sheet the provisions made as per NBFC-SI Directions without netting them from the income or against the value of the assets. These provisions shall be distinctly indicated under separate heads of accounts for ‘provisions for bad and doubtful debts’ and ‘provisions for depreciation in investments’ and shall not be appropriated from the general provisions and loss reserves held, if any, by it. Such provisions for each year shall be debited to the profit and loss account, and the excess, if any, held as general provisions and loss reserves shall be written back without making adjustment against them.

Capital Adequacy Norms

As per the NBFC-SI Directions, every NBFC is subject to capital adequacy requirements. Every NBFC shall

maintain a capital adequacy ratio consisting of Tier I and Tier II capital which shall not be less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. The total tier II capital of an NBFC, at any point of time, shall not exceed 100% of its tier I capital.

Corporate governance norms

As per the NBFC-SI Directions, all NBFCs are required to adhere to certain corporate governance norms, including constitution of an audit committee, a nomination committee, an asset liability management committee and a risk management committee. The audit committee should consist of not less than three members of its board of directors, and it must ensure that an information system audit of the internal systems and processes is conducted at least once in two years to assess operational risks faced. Nomination committee is required to ensure 'fit and proper' status of proposed/ existing director and in order to manage the integrated risk, all NBFCs shall form a risk management committee, besides the asset liability management committee. In addition to this, all NBFCs shall ensure that a policy is put in place with the approval of the board of directors for ascertaining the fit and proper criteria of the directors at the time of appointment, and on a continuing basis. All NBFCs are also required to put up to the board of directors, at regular intervals, as may be prescribed the progress made in putting in place a progressive risk management system and risk management policy and strategy followed by the NBFC, conformity with corporate governance standards viz., composition of various committees, their role and functions, periodicity of the meetings, compliance with coverage and review functions, etc. The NBFCs will also have to adhere to certain other norms in connection with disclosure, transparency and rotation of partners of the statutory audit firm.

Fair Practices Code

As per the NBFC-SI Directions, NBFCs having customer interfaces should mandatorily adopt the guidelines wherein all communications to the borrower shall be in the vernacular language or a language as understood by the borrower. Loan application forms shall include necessary information which affects the interest of the borrower, so that a meaningful comparison with the terms and conditions offered by other NBFCs can be made and informed decision can be taken by the borrower. NBFCs should also give notice to the borrower in the vernacular language or a language as understood by the borrower of any change in the terms and conditions including disbursement schedule, interest rates, service charges, prepayment charges etc. NBFCs shall ensure that changes in interest rates and charges are effected only prospectively. The board of directors shall also lay down the appropriate grievance redressal mechanism within the organization. Such a mechanism shall ensure that all disputes arising out of the decisions of lending institutions' functionaries are heard and disposed of at least at the next higher level.

In case of receipt of request from the borrower for transfer of borrowal account, the consent or otherwise i.e., objection of the NBFC, if any, shall be conveyed within 21 days from the date of receipt of request. Such transfer shall be as per transparent contractual terms in consonance with law and in the matter of recovery of loans, an NBFC shall not resort to undue harassment methods which include persistently bothering the borrowers at odd hours, use muscle power for recovery of loans etc. NBFC shall also ensure that the staffs are adequately trained to deal with the customers in an appropriate manner.

Asset Liability Management

As part of the NBFC-SI Directions, the RBI has prescribed the Guidelines for Asset Liability Management ("ALM") System in relation to NBFCs ("ALM Guidelines"), which would involve the assessment of various types of risks and altering the asset-liability portfolio in a dynamic way in order to manage risks. The ALM Guidelines mainly address liquidity and interest rate risks. As per the ALM Guidelines, the NBFCs having an asset base of ₹1,000 million or more, are required to put in place an ALM system. As a pre-requisite, NBFCs are required to install a strong 'Management Information System', which shall be computerised and shall make use of specialised software for managing the assets and liabilities with respect to the maturity mismatches, and the various risks associated with such mismatches. Norms for Excessive Interest Rates

The NBFC-SI Directions directs the board of directors of NBFCs to adopt an interest rate model, taking into account relevant factors such as cost of funds, margin and risk premium and determine the rate of interest to be charged for loans and advances. The rate of interest and the approach for gradations of risk and rationale for charging different rate of interest to different categories of borrowers shall be disclosed to the borrower or customer in the application form and communicated explicitly in the sanction letter. Laws in relation to the recovery of debts

Insolvency and Bankruptcy Code, 2016 (the “IB Code”)

The IB Code primarily enables time-bound reorganisation and insolvency resolution of debtors. The primary objectives of the IB Code are:

- i. to consolidate and amend the laws relating to reorganisation and insolvency resolution of corporate persons, partnership firms and individuals in a time bound manner for maximisation of value of assets of such persons;
- ii. to promote entrepreneurship, availability of credit and balance the interests of all the stakeholders, including alteration in the order of priority of payment of Government dues; and
- iii. to establish an Insolvency and Bankruptcy Board of India.

The IB Code specifies two different sets of adjudicating authorities to exercise judicial control over the insolvency and liquidation processes:

- i. In case of companies, limited liability partnerships and other limited liability entities, National Company Law Tribunals (“NCLT”) shall act as the adjudicating authority; and appeals therefrom shall lie with the National Company Law Appellate Tribunal (“NCLAT”).
- ii. In case of individuals and partnerships, Debt Recovery Tribunal (“DRT”) shall act as the adjudicating authority; and appeals therefrom shall lie with the Debt Recovery Appellate Tribunal (“DRAT”).

The Supreme Court of India shall have appellate jurisdiction over NCLAT and DRAT. The IB Code governs two corporate insolvency processes, i.e. (i) insolvency resolution; and (ii) liquidation:

- i. *Insolvency resolution:* Upon a default by a corporate debtor, a creditor or the debtor itself may initiate insolvency resolution proceedings. The IB Code prescribes a timeline of 180 days for the insolvency resolution process, subject to a single extension of 90 days, during which there shall be a moratorium on the institution or continuation of suits against the debtor, or interference with its assets. During such period, the creditors and the debtor will be expected to negotiate and finalise a resolution plan, with the assistance of insolvency resolution professionals to be appointed by a committee of creditors formed for this purpose. Upon approval of such a plan by the adjudicating authority, the same shall become binding upon the creditors and the debtor.
- ii. *Liquidation:* In the event that no insolvency resolution is successfully formulated, or if the adjudicating authority so decides, a liquidation process may be initiated against the debtor. A liquidator is appointed, who takes the assets and properties of the debtor in his custody and verifies claims of creditors, before selling such assets and properties and distributing the proceeds therefrom to creditors.

The bankruptcy of an individual can be initiated by the debtor, the creditors (either jointly or individually) or by any partner of a partnership firm (where the debtor is a firm), only after the failure of the Insolvency Resolution Process (IRP) or non-implementation of repayment plan. The bankruptcy trustee is responsible for administration of the estate of the bankrupt and for distribution of the proceeds on basis of the priority set out in the Code.

In addition, the IB Code establishes and provides for the functioning of the Insolvency and Bankruptcy Board of India (“IBBI”) which functions as the regulator for matters pertaining to insolvency and bankruptcy. The IBBI exercises a range of legislative, administrative and quasi-judicial functions, *inter alia* in relation to the registration, regulation and monitoring of insolvency professional agencies, insolvency professionals and information utilities; publish information, data, research and studies as may be specified; constitute committees as may be required; and make regulations and guidelines in relation to insolvency and bankruptcy.

Recovery of Debts due to Banks and Financial Institutions Act, 1993 (“Debts Recovery Act”)

The Debts Recovery Act provides for establishment of DRTs for expeditious adjudication and recovery of debts due to a bank or financial institution, or a consortium of banks or financial institutions. The Debts Recovery Act is only applicable to such debts as are for a sum that is greater than ₹1 million, or in the case of particular debts that the Central Government may specify, greater than ₹0.1 million. A DRT established under the Debts Recovery Act exercises jurisdiction over applications from banks and financial institutions for the recovery of debts due to them, and no court or other authority can exercise jurisdiction in relation to matters covered by the Debts Recovery Act, except the higher courts in India in certain circumstances. The Debts Recovery Act also provides for the establishment of DRATs, and any appeal from any order of a DRT lies with a DRAT. Further, the Debts Recovery Act provides for the procedure to be followed in proceedings before a DRT or DRAT.

Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (“Securitisation Act”)

The Securitisation Act grants certain special rights to banks and financial institutions to enforce their security interests upon non-payment of a secured debt. The Securitisation Act provides that a secured creditor may, in the case of a default in payment of a debt or an instalment thereof, classify the account of the borrower as a NPA, and give notice in writing to the borrower requiring it to discharge its liabilities within 60 days, failing which the following rights accrue to the secured creditor:

- i. taking possession of the assets constituting the security for the loan, including the right to transfer the assets by way of lease, assignment or sale of the asset;
- ii. taking over the management of the business of the borrower, including the right to sell or otherwise dispose of the assets, in case a significant portion of the debtor’s business is held as security;
- iii. appointment of a manager to manage the secured assets; and
- iv. requiring that any person who has acquired any of the secured assets from the borrower and from whom any money is or may become due to the debtor, to pay the secured creditor instead.

Where a secured creditor seeks to take a secured asset into its possession or sell or transfer the same under the provisions of the Securitisation Act, the secured creditor may make a written request to the Chief Metropolitan Magistrate or the District Magistrate within whose jurisdiction the secured asset or relevant documents may be situated or found. Upon such request, the Chief Metropolitan Magistrate or District Magistrate may take possession of such assets and/ or relevant documents and forward the same to the creditor, using or directing the use of such force as may be necessary. In addition, the secured creditor may file an application before a DRT or a competent court for recovery of balance amounts, if any, and may take any other measures for the recovery of debts.

Further, the Securitisation Act provides for the creation of a central database by the Central Government for recording rights over any property or creation, modification or satisfaction of any security interest thereon. This registry is to be integrated with registration records under various central registrations, including the Companies Act, 2013, the Registration Act, 1908 and the Motor Vehicles Act, 1988. Any registration of transactions of creation, modification or satisfaction of security interest by a creditor or filing of attachment orders shall be deemed to constitute a public notice. Where a security interest or attachment order upon property in favour of a creditor is filed for registration, the claim of such creditor has priority over any subsequent security interest, transfer or attachment order upon the property.

In addition, the Securitisation Act regulates ‘asset reconstruction companies’, which are companies intended to carry on the business of securitisation or asset reconstruction. An asset reconstruction company, upon being registered by the RBI, may acquire the financial assets of a bank or financial institution, whereupon it shall be deemed to become the lender in place of the bank in relation to such financial assets, and all rights of the bank or financial institution in relation to such financial assets shall vest in the asset reconstruction company. For the purposes of asset reconstruction, an asset reconstruction company may *inter alia* provide for the management of the business of a borrower (including a change in or take over of its management), sale or lease of the business of a borrower, rescheduling payment of debts, settlement of dues, enforcement or possession of security interests, or conversion of debt of a borrower into shares.

Anti-Money Laundering laws

Prevention of Money Laundering Act, 2002 (“PMLA”)

The PMLA was enacted to prevent money laundering and to provide for confiscation of property derived from or involved in, money laundering. The Government, under the PMLA, has issued the Prevention of Money laundering (Maintenance of Records of the Nature and Value of Transactions, the Procedure and Manner of Maintaining and Time for Furnishing Information and Verification and Maintenance of Records of the Identity of the Clients of the Banking Companies, Financial Institutions and Intermediaries) Rules, 2005 (“PML Rules”). The PMLA and PML Rules place various obligations upon banks, financial institutions and other intermediaries in relation to the

maintenance of records of all transactions, verification of clients and identification of beneficial owners of clients.

Master Circular – ‘Know Your Customer’ (KYC) Guidelines – Anti Money Laundering Standards (AML) - ‘Prevention of Money Laundering Act, 2002 - Obligations of NBFCs in terms of Rules notified thereunder’ (“PMLA Master Circular”)

The RBI has issued the PMLA Master Circular dated July 1, 2015 to ensure that a proper policy framework for the implementation of the PMLA and PML Rules is put into place. Pursuant to the provisions of PMLA, PML Rules and the RBI guidelines, all NBFCs are advised to appoint a principal officer for internal reporting of suspicious transactions and cash transactions and to maintain a system of internal reporting for: (i) all cash transactions of value of more than ₹1 million; (ii) all series of cash transactions integrally connected to each other which have been valued below ₹1 million where such series of transactions have taken place within one month and the aggregate value of such transaction exceeds ₹1 million.

Under the PMLA Master Circular, all NBFCs are required to introduce a system of maintaining a proper record of certain transactions, and for the proper maintenance and preservation of account information in a manner that allows data to be retrieved easily and quickly whenever required or when requested by the competent authorities. NBFCs are also required to maintain for at least ten years from the date of transaction between the NBFCs and the client, all necessary records of transactions, both domestic or international, which will permit reconstruction of individual transactions (including the amounts and types of currency involved if any) so as to provide, if necessary, evidence for prosecution of persons involved in criminal activity. Further, NBFCs shall exercise on-going due diligence with respect to the business relationship with every client and closely examine the transactions in order to ensure that they are consistent with their knowledge of the client, his business and risk profile and where necessary, the source of funds.

Laws in relation to foreign investment and external commercial borrowing

Foreign Exchange Management Act, 1999 (“FEMA”)

Foreign investment in Indian securities is regulated through the Consolidated Foreign Direct Investment (“**FDI**”) Policy and Foreign Exchange Management Act, 1999 (“**FEMA**”). The government bodies responsible for granting foreign investment approvals are the concerned ministries/ departments of the Government of India and the RBI. The Union Cabinet has approved phasing out the Foreign Investment Promotion Board, as provided in the press release dated May 24, 2017. Accordingly, pursuant to the office memorandum dated June 5, 2017, issued by the Department of Economic Affairs, Ministry of Finance, approval of foreign investment under the FDI policy has been entrusted to concerned ministries/departments. Subsequently, the Department of Industrial Policy & Promotion (“**DIPP**”) issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the “**SOP**”). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned administrative ministry/department shall act as the competent authority (the “**Competent Authority**”) for the grant of post facto approval of foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority. The DIPP has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendment to FEMA. In case of any conflict FEMA prevails.

The Consolidated FDI Policy consolidates the policy framework in place as on August 27, 2017. Further, on January 4, 2018 the RBI released the Master Direction on Foreign Investment in India. Under the approval route, prior approval from the FIPB or RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the FIPB, which is chaired by the Secretary, DIPP, with the Union Finance Secretary, Commerce Secretary and other key Secretaries of the Government of India as its members.

As per the sector specific guidelines of the Government of India, 100% FDI/ Non-Resident Indian (“**NRI**”) investments are allowed under the automatic route in certain NBFC activities subject to compliance with guidelines of the RBI in this regard.

External Commercial borrowing (ECB)

External Commercial Borrowings (“**ECB**”) are commercial loans raised by eligible resident entities from recognised non-resident entities. ECB transactions are governed by clause (d) of sub-section 3 of section 6 of FEMA, and by various regulations, notifications and RBI circulars, which have been consolidated in the RBI Master Direction on External Commercial Borrowings, Trade Credit, Borrowing and Lending in Foreign Currency by Authorised Dealers and Persons other than Authorised Dealers, dated January 1, 2016 (“**ECB Master Directions**”) and updated periodically. Under the ECB Master Directions, a permitted resident may borrow from a recognised non-resident entity through loans, securitised instruments, buyers’ or suppliers’ credit, foreign currency convertible bonds,

financial lease and foreign currency exchangeable bonds. Non-convertible debentures issued to registered foreign portfolio investors are not covered by the ECB Master Directions.

Previously, borrowings through ECB could be raised through one of three tracks:

(i)	Track I	Medium term foreign currency denominated ECB with minimum average maturity of 3/5 years.
(ii)	Track II	Long term foreign currency denominated ECB with minimum average maturity of 10 years.
(iii)	Track III	Indian Rupee (INR) denominated ECB with minimum average maturity of 3/5 years.

However, vide a notification bearing reference no. RBI/2018-19/109 dated January 16, 2019, the RBI has merged Track I and Track II as shown in the above table into one consolidated track as “Foreign Currency denominated ECB” with minimum average maturity of 3/5 years. Further Track III and Rupee Denominated Bonds framework has been merged into one consolidated track as “Rupee Denominated ECB” with minimum average maturity of 3/5 years.

AFCs can raise ECB only for financing infrastructure.

ECB may be raised by either automatic route or the approval route. Under the automatic route, ECB cases are examined by the Authorised Dealer Category-I, to whom the RBI has delegated the function of monitoring and approving ECB transactions. In borrowings through the approval route, the prospective borrowers are required to forward requests to the RBI through an authorised dealer. The ECB Master Directions prescribe individual limits of ECB that may be raised by an entity under the automatic route per Fiscal, beyond which, the ECB proposals of such entities shall come under the approval route. Accordingly, an AFC is permitted to raise up to USD 750 million or equivalent through the automatic route.

The ECB Master Directions provide for various aspects of ECB transactions, including *inter alia* eligible borrowers, recognised lenders, eligibility for the track and route of the ECB, minimum average maturity period, end-use prescriptions, hedging requirements etc. Under the ECB Master Directions, an AFC is only permitted to raise borrowings through ECB for the purpose of financing infrastructure.

SUMMARY OF SIGNIFICANT DIFFERENCES BETWEEN INDIAN GAAP AND INDIAN ACCOUNTING STANDARDS

The Reformatted Financial Statements of the Issuer included in this Shelf Prospectus are presented in accordance with Indian GAAP, which differs from Indian Accounting Standards (“**IndAS**”) in certain respects. The Ministry of Corporate Affairs (“**MCA**”), in its press release dated January 18, 2016, issued a roadmap for implementation of IndAS converged with IFRS for non-banking financial companies, scheduled 50 commercial banks, insurers, and insurance companies, which was subsequently confirmed by the RBI through its circular dated February 11, 2016. The notification further explains that NBFCs having a net worth of ₹ 50,000 lakh or more as of March 31, 2016, shall comply with IndAS for accounting periods beginning on or after April 1, 2018, with comparatives for the periods ending on March 31, 2018. Therefore, the Issuer would be subject to this notification.

“*Summary of Significant Differences among Indian GAAP and IndAS*”, does not present all differences between

Indian GAAP and IndAS which are relevant to the Issuer. Consequently, there can be no assurance that those are the only differences in the accounting principles that could have a significant impact on the financial information included in this Shelf Prospectus. Furthermore, the Issuer has made no attempt to identify or quantify the impact of these differences or any future differences between Indian GAAP and IndAS which may result from prospective changes in accounting standards. The Issuer has not considered matters of Indian GAAP presentation and disclosures, which also differ from IndAS. In making an investment decision, investors must rely upon their own examination of the Issuer’s business, the terms of the offerings and the financial information included in this Shelf Prospectus. Potential investors should consult with their own professional advisors for a more thorough understanding of the differences between Indian GAAP and IndAS and how those differences might affect the financial information included in this Shelf Prospectus. The Issuer cannot assure that it has completed a comprehensive analysis of the effect of IndAS on future financial information or that the application of IndAS will not result in a materially adverse effect on the Issuer’s future financial information.

Summary of Significant Differences among Indian GAAP and IndAS:

Particulars	Treatment as per Indian GAAP	Treatment as per Ind-AS
Presentation of Financial Statements	Other Comprehensive Income: There is no concept of ‘Other Comprehensive Income’ under Indian GAAP.	Other Comprehensive Income: IndAS 1 introduces the concept of other Comprehensive Income (“ OCI ”). Other comprehensive income comprises items of income and expense (including reclassification adjustments) that are not recognized in profit or loss as required or permitted by other IndAS.
	Extraordinary items: Under Indian GAAP, extraordinary items are disclosed separately in the statement of profit and loss and are included in the determination of net profit or loss for the period. Items of income or expense to be disclosed as extraordinary should be distinct from the ordinary activities and are determined by the nature of the event or transaction in relation to the business ordinarily carried out by an entity.	Extraordinary items: Under IndAS, presentation of any items of income or expense as extraordinary is prohibited.
	Change in Accounting Policies: Indian GAAP requires changes in accounting policies to be presented in the financial statements on a prospective basis (unless transitional provisions, if any, of an accounting standard require otherwise) together with a disclosure of the impact of the same, if material. If a change in the accounting policy has no material effect on	Change in Accounting Policies: IndAS requires retrospective application of changes in accounting policies by adjusting the opening balance of each affected component of equity for the earliest prior period presented and the other comparative amounts for each period presented as if the new accounting policy had

	the financial statements for the current period but is expected to have a material effect in the later periods, the same should be appropriately disclosed.	always been applied, unless transitional provisions of an accounting standard require otherwise.
Deferred Taxes	Under Indian GAAP, the Company determines deferred tax to be recognized in the financial statements with reference to the income statement approach i.e. with reference to the timing differences between profit offered for income taxes and profit as per the financial statements.	As per IndAS 12 Income Taxes, deferred tax is determined with reference to the balance sheet approach i.e. based on the differences between carrying value of the assets/liabilities and their respective tax base. Using the balance sheet approach, there could be additional deferred tax charge/ income on account of all IndAS opening balance sheet adjustments.
Property, plant and Equipment– reviewing, depreciation and residual value	Under Indian GAAP, the Company currently provides depreciation on straight line method over the useful lives of the assets estimated by the Management.	IndAS 16 mandates reviewing the method of depreciation, estimated useful life and estimated residual value of an asset at least once in a year. The effect of any change in the estimated useful and residual value shall be taken prospectively. IndAS 101 allows current carrying value under Indian GAAP for items of property, plant and equipment to be carried forward as the cost under IndAS.
Accounting for Employee benefits	Currently, all actuarial gains and losses are recognized immediately in the statement of profit and loss.	Under IndAS 19, the change in liability is split into changes arising out of service, interest cost and re measurements and the change in asset is split between interest income and re measurements. Changes due to service cost and net interest cost/ income need to be recognized in the income statement and the changes arising out of re measurements comprising of actuarial gains and losses representing changes in the present value of the defined benefit obligation resulting from experience adjustment and effects of changes in actuarial assumptions are to be recognized directly in OCI.
Separate Financial Statements	Accounting for investments in subsidiaries is governed by Accounting Standard 13 depending on the classification of the investment as current or long term.	Accounting for investments in subsidiaries is governed by Ind AS 27 which gives an option to account the same at cost or in accordance with Ind AS 109.
Provisions, contingent liabilities and contingent assets	Under Indian GAAP, provisions are recognised only under a legal obligation. Also, discounting of provisions to present value is not permitted	Under IndAS, provisions are recognised for legal as well as constructive obligations. IndAS requires discounting the provisions to present value, if the effect of time value of money is material
Share based Payments	Under Indian GAAP, company has an option to account for share based payments on the basis of intrinsic value or fair value. The company followed the intrinsic value	Under IndAS, the share-based payments have to be mandatorily accounted basis the fair value and the same has to be recorded in the

	method and gave a disclosure for the fair valuation.	Statement of Profit or Loss over the vesting period. The fair valuation of the unvested options as on the transition date have to be adjusted against retained earnings
The pooling of interests and purchase method	Amalgamations in the nature of purchase are accounted for by recording the identifiable assets and liabilities of the acquiree either at the fair values or at book values. Amalgamations in the nature of merger are accounted under the pooling of interests' method.	All business combinations, other than those between entities under common control, are accounted for using the purchase method. An acquirer is identified for all business combinations, which is the entity that obtains control of the other combining entity. Business combination transactions between entities under common control should be accounted for using the 'pooling of interests' method.
Presentation and classification of Financial Instruments and subsequent measurement	Currently, under Indian GAAP, the financial assets and financial liabilities are recognised at the transaction value. The Company classifies all its financial assets and liabilities as short term or long term. Long term investments are carried at cost less any permanent diminution in the value of such investments determined on a specific identification basis. Current investments are carried at lower of cost and fair value. Financial liabilities are carried at their transaction values. Disclosures under Indian GAAP are limited. Currently under Indian GAAP, loan processing fees and/or fees of similar nature are recognized upfront in the Statement of Profit and Loss.	Ind AS 109 requires all financial assets and financial liabilities to be recognised on initial recognition at fair value. Financial assets have to be either classified as measured at amortised cost or measured at fair value. Where assets are measured at fair value, gains and losses are either recognised entirely in profit or loss, (FVTPL), or recognised in other comprehensive income (FVOCI). Financial assets include equity and debts investments, interest free deposits, loans, trade receivables etc. Assets classified at amortised cost and FVOCI and the related revenue (including processing fees and fees of similar nature) net of related costs have to be measured using the Effective Interest Rate (EIR) method. Loan processing fees and/or fees of similar nature would be measured and recognised using the Effective Interest Rate (EIR) method over the period of loan. There are two measurement categories for financial liabilities – FVTPL and amortised cost. Fair value adjustment on transition shall be adjusted against opening retained earnings on the date of transition. Disclosures under Ind AS are extensive.
Financial Instruments – Impairment	Under Indian GAAP, the Company assesses the provision for doubtful debts at each reporting period, which in practice, is based on relevant information like past experience, financial position of the debtor, cash flows of the debtor, guidelines issued by the regulator etc.	The impairment model in IndAS is based on expected credit losses and it applies equally to debt instruments measured at amortized cost or FVOCI, lease receivables, contract assets within the scope of IndAS 109 and certain written loan commitments and financial guarantee contracts.
Financial Instruments – Disclosure	Currently there are no detailed disclosure requirements for financial instruments.	Requires disclosure of information about the nature and extent of risks

Particulars	Treatment as per Indian GAAP	Treatment as per Ind-AS
	<p>However, the ICAI has issued an Announcement in December 2005 requiring the following disclosures to be made in respect of derivative instruments in the financial statements:</p> <ul style="list-style-type: none"> • Category-wise quantitative data about derivative instruments that are outstanding at the balance sheet date; • The purpose, viz., hedging or speculation, for which such derivative instruments have been acquired; and • The foreign currency exposures that are not hedged by a derivative instrument or otherwise. 	<p>arising from financial instruments:</p> <ul style="list-style-type: none"> • qualitative disclosures about exposures to each type of risk and how those risks are managed; and • quantitative disclosures about exposures to each type of risk, separately for credit risk, liquidity risk and market risk (including sensitivity analysis).
Segment Reporting	<p>Under Indian GAAP there is a requirement to identify two sets of segments (business and geographical), using a risks and rewards approach, with the entity's system of internal financial reporting to key management personnel serving only as the starting point for the identification of such segments.</p>	<p>Operating segments are identified based on the financial information that is regularly reviewed by the chief operating decision maker in deciding how to allocate resources and in assessing performance.</p>
Consolidated Financial Statements	<p>Under Indian GAAP the consolidation is driven by the reporting entity's control Over its investees namely subsidiaries, associates and joint ventures. Control is: (a) the ownership, directly or indirectly through subsidiary(ies), of more than one-half of the voting power of an entity; or (b) control of the composition of the board of directors in the case of a company or of the composition of the corresponding governing body in case of any other entity so as to obtain economic benefits from its activities. Therefore, a mere ownership of more than 50 per cent of equity shares is sufficient to constitute control under Indian GAAP, whereas this is not necessarily so under Ind AS.</p>	<p>Control is based on whether an investor has: (a) power over the investee; (b) exposure, or rights, to variable return from its involvement with the investee; and (c) the ability to use its power over the investee to affect the amounts of the returns.</p>
Consolidation - Exclusion of subsidiaries, associates and joint ventures	<p>Excluded from consolidation, equity accounting or proportionate consolidation if the subsidiary/ investment/ interest in joint venture was acquired with intent to dispose of in the near future (which, ordinarily means not more than 12 months, unless a longer period can be justified based on facts and circumstances of the case) or if it operates under severe long term restrictions which significantly impair its ability to transfer funds to the parent/ investor/ venture.</p>	<p>Consolidated financial statements include all subsidiaries and equity accounted associates and joint ventures. No exemption for "temporary control", "different lines of business" or "subsidiary/ associate/ joint venture that operates under severe long- term funds transfer restrictions" except when the investment is determined as held for sale in accordance with IndAS.</p>
Consolidation - Joint Ventures	<p>Under Indian GAAP, Proportionate consolidation method is applied when the entity prepares consolidated financial statements.</p>	<p>The equity method, as described in Ind AS 28 is applied when the entity prepares consolidated financial statements.</p>

Limited Review Report

Review Report to
The Board of Directors
Srei Infrastructure Finance Limited

1. We have reviewed the accompanying Statement of Standalone Unaudited Financial Results of **Srei Infrastructure Finance Limited** (“the Company”) for the quarter and nine months ended December 31, 2018 (“the Statement”), being submitted by the Company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 read with Circular No. CIR/CFD/CMD/15/2015 dated November 30, 2015 and Circular No. CIR/CFD/FAC/62/2016 dated July 5, 2016. This Statement, which is the responsibility of the Company’s Management and approved by the Board of Directors in its meeting held on February 04, 2019, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 “Interim Financial Reporting” as prescribed under Section 133 of Companies Act, 2013 read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to issue a report on the Statement based on our review.
2. We conducted our review of the Statement in accordance with the Standard on Review Engagement (SRE) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”, issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review is limited primarily to inquiries of the Company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
3. Based on our review conducted as mentioned in paragraph 2 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the aforesaid Indian Accounting Standard and other recognized accounting practices and policies, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 read with Circular No. CIR/CFD/CMD/15/2015 dated November 30, 2015 and Circular No. CIR/CFD/FAC/62/2016 dated July 5, 2016, including the manner in which it is to be disclosed, or that it contains any material misstatement.

The Company, in order to hedge itself against the adverse impact of fluctuations in foreign currency rates / variable interest benchmark on underlying liability, enters into derivative contracts. The Company does not enter into derivative contracts for speculation or trading purposes. Derivative contracts which are covered under AS 11, are accounted for as per the aforesaid policy on Foreign Currency Transactions and Translations.

In accordance with the Guidance Note on Accounting for Derivatives Contracts ('Guidance Note') issued by the Institute of Chartered Accountants of India, the Company has classified derivative contracts (not covered under AS 11) as hedging instruments and adopted cash flow hedge accounting model for such contracts.

As per the requirement of the Guidance note, all applicable derivatives are recognized in the Balance Sheet at Fair Value and classified as hedging derivative, if the same are designated as part of an effective hedge relationship. The carrying amount of derivative are re measured at Fair Value throughout the life of the Contract. The method of recognizing the resulting fair value gain loss on derivative depends on whether the derivative is designated as hedging instrument and, if so on the nature of the item hedged. Hedge accounting is used for derivative designated in the aforesaid way provided certain criteria as stated in the guidance note are met.

The Company has designated the derivatives covered under the guidance note as Hedges of the highly probable future cash flows attributable to a recognized asset or liability (Cash Flow Hedge). The effective portion of the changes in fair value of derivative in case of cash flow hedges are recognized in the cash flow hedge reserve as part of the Equity. The accumulated hedge reserves in the equity are adjusted in the periods in which the hedge items effects the Income Statement. When the hedging instruments expired or sold or when the hedge no longer meet the criteria for hedge accounting, the cumulative gain / loss existing in the equity as hedging reserve remains in the equity and are adjusted when the forecasted transactions / hedge element is ultimately recognized in the income statement.

Net gain, if any, after considering the offsetting effect of loss on the underlying hedged item, is ignored as a matter of prudence. The deferred tax assets and deferred tax liabilities relate to the taxes on income levied by the same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. 14 Disclosures on Risk Exposure in Derivatives

(i) Qualitative Disclosure

The structure and organization for management of risk in derivatives trading, is not applicable since the Company is not engaged in derivative trading.

Besides other market risks / core functions, Asset Liability Committee (ALCO) manages the Foreign Currency and Interest Rate Risks also. The company has put in place the policies for hedging / mitigating risks / strategies and processes for continuous monitoring of risks, which will enable the company to quantify risk, both on account of Foreign Currency and Interest Rate Risks. Apart from ALCO there is a Risk Committee of the Board which guides the company in these risks.

The Board has delegated authority to company officials in the Forex Treasury department for entering into Generic derivative products besides Forward Contracts, on behalf of the company, to hedge the Foreign Currency and Interest Rate Risk exposures.

The company has a Market Risk Policy which paves the way for risk reporting and risk monitoring systems. The marked-to-market values are obtained from the banks with whom the hedge deals are done.

The Company, in order to hedge itself against the adverse impact of fluctuations in foreign currency rates / variable interest benchmark on underlying liability, enters into derivative contracts.

Derivate contracts which are covered under AS 11, are accounted for as per the aforesaid policy for Foreign Currency Transactions and Translations.

The Company does not enter into derivative contracts for speculation or trading purposes. In accordance with the Guidance Note on Accounting for Derivatives ('Guidance Note') issued by the Institute of Chartered Accountants of India, the Company has classified derivative contracts (not covered under AS 11) as a hedging instrument and adopted cash flow hedge accounting model.

The hedging instrument is measured at fair value, but any gain or loss that is determined to be an effective hedge is recognised in cash flow hedge reserve and recycled to the statement of profit & loss to offset the gains and losses of the hedged items.

The premium or discount arising at the inception of forward exchange contracts is amortised as expense or income over the life of the respective contracts. Exchange differences on such contracts are recognised in the Statement of Profit and Loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or expense in the year in which it is cancelled or renewed.

The company has put in place the policies for hedging / mitigating risks / strategies and processes for continuous monitoring of risks, which will enable the company to quantify risk, both on account of Foreign Currency and Interest Rate Risks. Apart from ALCO there is a Risk Committee of the Board which guides the company in these risks.

The Board has delegated authority to company officials in the Forex Treasury department for entering into Generic derivative products besides Forward Contracts, on behalf of the company, to hedge the Foreign Currency and Interest Rate Risk exposures.

Derivate contracts which are covered under AS 11, are accounted for as per the aforesaid policy for Foreign Currency Transactions and Translations.

The Company does not enter into derivative contracts for speculation or trading purposes. In accordance with the Guidance Note on Accounting for Derivatives ('Guidance Note') issued by the Institute of Chartered Accountants of India, the Company has classified derivative contracts (not covered under AS 11) as a hedging instrument and adopted cash flow hedge accounting model. The hedging instrument is measured at fair value, but any gain or loss that is determined to be an effective hedge is recognised in cash flow hedge reserve and recycled to the statement of profit & loss to offset the gains and losses of the hedged items.

The premium or discount arising at the inception of forward exchange contracts is amortised as expense or income over the life of the respective contracts. Exchange differences on such contracts are recognised in the Statement of Profit and Loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or expense in the year in which it is cancelled or renewed.

In accordance with the ICAI announcement, derivative contracts, other than foreign currency forward contracts covered under AS 11, are "marked to market" on a portfolio basis, and the net loss, if any, after considering the offsetting effect of gain on the underlying hedged item, is charged to the Statement of Profit and Loss. Net gain, if any, after considering the offsetting effect of loss on the underlying hedged item, is ignored. The Company believes that the above treatment reflects the true effect of the hedge and also reflects the economic substance of the impact of derivative contracts.

The premium or discount arising at the inception of forward exchange contracts is amortised as expense or income over the life of the respective contracts. Exchange differences on such contracts are recognised in the Statement of Profit and Loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or expense in the year in which it is cancelled or renewed.

14 Disclosures on Risk Exposure in Derivatives

(i) Qualitative Disclosure

The structure and organization for management of risk in derivatives trading, is not applicable since the Company is not engaged in derivative trading.

Besides other market risks / core functions, Asset Liability Committee (ALCO) manages the Foreign Currency and Interest Rate Risks also. The company has put in place the policies for hedging / mitigating risks / strategies and processes for continuous monitoring of risks, which will enable the company to quantify risk, both on account of Foreign Currency and Interest Rate Risks. Apart from ALCO there is a Risk Committee of the Board which guides the company in these risks.

The Board has delegated authority to company officials in the FX Treasury department for entering into Generic derivative products besides Forward Contracts, on behalf of the company, to hedge the Foreign Currency and Interest Rate Risk exposures.

Annexure - V

The company has a Market Risk Policy which paves the way for risk reporting and risk monitoring systems. The marked-to-market values are obtained from the banks with whom the hedge deals are done.

The Company, in order to hedge itself against the adverse impact of fluctuations in foreign currency rates / variable interest benchmark on underlying liability, enters into the derivative contracts in the nature of forward exchange contracts. The Company does not enter into derivative contracts for speculation or trading purposes. Derivate contracts which are closely linked to the existing assets and liabilities are accounted for as per the policy stated for foreign currency transactions and translation.

In accordance with the ICAI announcement, derivative contracts, other than foreign currency forward contracts covered under AS 11, are "marked to market" on a portfolio basis, and the net loss, if any, after considering the offsetting effect of gain on the underlying hedged item, is charged to the Statement of Profit and Loss. Net gain, if any, after considering the offsetting effect of loss on the underlying hedged item, is ignored. The Company believes that the above treatment reflects the true effect of the hedge and also reflects the economic substance of the impact of derivative contracts.

The premium or discount arising at the inception of forward exchange contracts is amortised as expense or income over the life of the respective contracts. Exchange differences on such contracts are recognised in the Statement of Profit and Loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or expense in the year in which it is cancelled or renewed.

Derivative contracts which are covered under AS 11, are accounted for as per the aforesaid policy on Foreign Currency Transactions and Translations.

In accordance with the Guidance Note on Accounting for Derivatives Contracts ('Guidance Note') issued by the Institute of Chartered Accountants of India, the Company has classified derivative contracts (not covered under AS 11) as hedging instruments and adopted cash flow hedge accounting model for such contracts.

As per the requirement of the Guidance note, all applicable derivatives are recognized in the Balance Sheet at Fair Value and classified as hedging derivative, if the same are designated as part of an effective hedge relationship. The carrying amount of derivative are re measured at Fair Value throughout the life of the Contract. The method of recognizing the resulting fair value gain loss on derivative depends on whether the derivative is designated as hedging instrument and, if so on the nature of the item hedged. Hedge accounting is used for derivative designated in the aforesaid way provided certain criteria as stated in the guidance note are met.

The Company has designated the derivatives covered under the guidance note as Hedges of the highly probable future cash flows attributable to a recognized asset or liability (Cash Flow Hedge). The effective portion of the changes in fair value of derivative in case of cash flow hedges are recognized in the cash flow hedge reserve as part of the Equity. The accumulated hedge reserves in the equity are adjusted in the periods in which the hedge items effects the Income Statement. When the hedging instruments expired or sold or when the hedge no longer meet the criteria for hedge accounting, the cumulative gain / loss existing in the equity as hedging reserve remains in the equity and are adjusted when the forecasted transactions / hedge element is ultimately recognized in the income statement.

Derivate contracts which are closely linked to the existing assets and liabilities are accounted for as per the aforesaid policy for Foreign Currency Transactions and Translations.

In accordance with the ICAI announcement, derivative contracts, other than foreign currency forward contracts covered under AS 11, are "marked to market" on a portfolio basis, and the net loss, if any, after considering the offsetting effect of gain on the underlying hedged item, is charged to the Statement of Profit and Loss. Net gain, if any, after considering the offsetting effect of loss on the underlying hedged item, is ignored as a matter of prudence. The Company believes that the above treatment reflects the true effect of the hedge and also reflects the economic substance of the impact of derivative contracts.

Financial Year: 2013-14

In terms of the announcement made by The Institute of Chartered Accountants of India, the accounting for derivative contracts (other than those covered under AS-11) is done based on the "marked to market" principle, on a portfolio basis and the net loss, after considering the offsetting effect on the underlying hedged item, is charged to the Statement of Profit and Loss. Financial Year : 2017-18

In terms of an Order from DRT-1, Kolkata dated 24 December, 2014 Deccan Chronicle Holding Limited (DCHL), one of the borrowers of the Holding Company, had in the financial year 2014-15 allotted to the Company 66,037,735 equity shares in DCHL pursuant to conversion of a portion of loan into equity shares by virtue of the Company's rights under the financial documents. However, during the corporate insolvency resolution process under the Insolvency and Bankruptcy Code, 2016 of DCHL, the Company has come to know that the said allotment of 66,037,735 equity shares by DCHL was contrary to law and therefore, void and ineffective. Since DCHL failed to give effect to such conversion, the Company had irrevocably and unconditionally withdrawn its right of conversion of loan into equity shares of DCHL vide its letter dated 23 April, 2018 to Resolution Professional of DCHL.

Financial Year : 2016-17 & 2015-16

²The Company holds 6,60,37,735 nos. (24.01%) of equity shares of Deccan Chronicle Holdings Limited (DCHL), which were acquired in pursuance of recovery of its loans to DCHL. Since the financial statements of DCHL are not available for the period beginning 1st October, 2012 onwards and the trading of DCHL shares stands suspended on the Stock Exchanges, a reliable ascertainment of value of these shares cannot be made. Hence, the Company has not yet adjusted the outstanding loan amount with the value of such shares.

Rating Assigned/Reaffirmed

Rationale/Description of Key Rating Drivers/Rating sensitivities:

BWR has essentially relied upon the Company's audited financials up to FY18, unaudited results upto H1FY19, projected financials for FY19 and FY20, publicly available information and information and clarification provided by the Company.

The rating assignment, inter alia, factors the Infrastructure Finance Company status enjoyed by SIFL as per RBI's prescribed norms, the time-tested experience of the promoter group in the line of infrastructure financing and equipment financing businesses, improvement in Net Interest Income and profit margin, improvement in asset quality as evidenced in decreasing NPA levels, adequate capitalization and sufficient cushion against commercial paper issue available in the form of unutilized working capital limits. The rating is, however, constrained by continued slow pace of the infrastructure sector and high portfolio concentration in power sector, road and SEZ/Industrial Park sector.

SIFL's performance is linked to the growth and health of Infrastructure Sector, which has gone through difficulties over the last couple of years, however is showing signs of recovery due to various initiatives taken by the government. With Government's increasing focus on infrastructure, outlook for the sector is expected to be better, and it will benefit SIFL's clients. Continuing focus on asset quality, steps to bring down overall borrowing cost, reducing ticket size of its exposures, maintaining adequate capitalization will be the key rating sensitivities.

Description of Key Rating Drivers

Credit Strengths:

- **Experienced Promoters:** Mr Hemant Kanoria , Chairman & Managing Director & Mr Sunil Kanoria, Vice Chairman, who have more than 3 decades of experience in financial services industry are spearheading the business operations and work closely with management in effectively managing the company.
- **Consistent growth in asset Base resulting in improved financial profile:** On a consolidated basis, Loan portfolio has consistently grown and as on 30 Sep 2018 stands at Rs 37,557 Crs mainly due to increase in equipment loan disbursements. This has resulted in Total operating income of Rs 2696 Crs and PAT of 251 Crs for H1FY19 when compared to Rs 2148 Crs and 151 Crs for H1FY18

- **Adequate capitalisation:** SIFL has always maintained adequate capitalisation against the regulatory requirement of minimum 15%. CRAR as on 30 Sept 2018 stood at 17.6%
- **Comfortable ALM & Liquidity profile:** Company has comfortable ALM profile and also maintains unutilised bank lines to further strengthen liquidity position. ALM profile as on 30 Sep 2018 demonstrates sufficient liquidity and has no cash flow mismatches in the near to medium term.

Credit Risks:

- **Asset Quality:** SIFL's performance is linked to the growth and health of Infrastructure Sector, which has gone through difficulties over the last couple of years (however, showing signs of recovery). This has resulted in higher delinquencies and also due to adoption of IND AS from 1 April 2018, the reported NPA Levels are higher when compared to earlier years. However, they have shown signs of improvement and for H1FY19 GNPA & NNPA stood at 9.7% & 5.1% respectively when compared to 12.8% & 7.2% for H1FY18.
- **High Gearing:** On a consolidated basis, total borrowings as on 31st March 2018 has increased to Rs 32,873 Crs when compared to Rs 26,204 Crs for FY18 against Tangible Networth of Rs 4881 Crs resulting in a increased gearing of 6.73 times.
- **Inherent Risks:** Currently, NBFC sector in India is facing liquidity challenges, resulting in increased borrowing costs and potential ALM mismatches in the short term. This will adversely affect spread for NBFCs. Also being in the competitive landscape of NBFCs, the Company is exposed to inherent risks associated with the industry.
